INDEX

A Lockout Hasp, also known as a safety hasp, is a device used in industrial settings to ensure machinery and equipment is safely shut off and cannot be restarted until maintenance or service work is completed. The main function of a lockout hasp is to provide multiple authorised workers the ability to apply their personal locks to individually secure a device or power source.

Each worker involved in the maintenance or service work will place their individual lock on the hasp, and the equipment cannot be restarted until all workers have removed their locks. This ensures that every worker has control over their own safety, preventing accidental restart of the equipment until everyone has completed their tasks and is safely out of harm's way.

VINYL COATED
LOCKOUT HASP

- Scissor action hasps are available in 25 mm and 38 mm Dia jaw size.
- Up to 6 padlocks with shackle diameters of 9 mm or less can be attached to the same energy source using the vinyl-coated hasp to execute lockout.
- Fit the scissor action hasp around the lockout point, clip it into place, and add as many padlocks as you need.
- It keeps the equipment inoperative during servicing and maintenance until the last worker has removed their personal padlock.
- Constructed from high-tensile steel that undergoes electro-plating to mitigate rusting, the Lockout Hasp is well-suited for rigorous industrial applications. In the case of Yellow Black hasps, a black powder coating is applied to the steel surface.
- The padlock fixing section is vinyl coated for better grip and visibility.

VINYL COATED
LOCKOUT HASP

- Made from high-tensile steel with electro-plating to prevent rusting, this lockout hasp is designed to withstand demanding industrial environments.

- The lockout hasp features a scissor action mechanism, with a 25 mm diameter jaw size, providing secure locking.

- The padlock fixing section of the hasp is vinyl coated, offering improved grip and visibility, ensuring ease of use.

- Accepts padlocks with a shackle diameter up to 9 mm.

- Besides 7 holes, 25 mm jaw size conventional vinyl coated hasps are also available in 12, 13, and 24 holes.

STANDARD RED POWDER COATED LOCKOUT HASP

- Constructed from durable steel with a red powder-coated finish for added resilience.
- Designed to be applied to a lockout point, allowing multiple padlocks to be attached simultaneously.
- Capable of accommodating up to six padlocks, providing secure lockout capability.
- Available in various models to meet specific requirements.
- Features interlocking jaws for easy positioning and secure locking of energy sources in the off position during lockout procedures.

STAINLESS STEEL
LOCKOUT HASP

Stainless Steel hasps are made as per internationally accepted designs. They are easy to use and acceptable at most of the isolation locking points.

ES - VC SSH - S / P Hasps are manufactured from 304 stainless steel sheet and have a sleek aluminum rivet. They are duly vinyl coated at the padlock insert holes - for better grip and visibility. Rustproof construction ensures long-lasting performance, even in harsh conditions. Suitable for places with high stress or chemical exposure.

ES - SSH - 25 is manufactured from 304 stainless steel sheet with a bright nickle plated finished using mixed aluminum die casted insert. Ideal for use in all industrial environments. Full body opening for easy & secure attachment around challenging isolation points. Stainless steel construction makes it ideal for environments prone to corrosion.

ES - SSH - 25 FSS is complete Stainless Steel piece with SS rivet and shackle .

TAGO 2-IN-1
LOCKOUT HASP

- Combines a hasp and tag into one convenient product for easy lockout and indication of lockout status.
- Features tags on both sides: front side includes a warning tag with space for specifying the reason for lockout, while the back side includes a unique label with space for adding a person's name next to their padlock (up to eight padlocks can be attached).
- Made from high-quality aluminum, ensuring durability and non-conductivity for electrical applications.
- Powder-coated finish provides enhanced durability, resistance to chipping, fading, rust, and corrosion.
- Built-in interlocking system across the jaws prevents unauthorized removal, ensuring additional security.

TWO WAY BLACK MG TOGGLE HASP

- Two way Merlin Gerin Padlocking Hasp.
- Merlin Gerin Powerpact 4c Toggle Padlocking Attachment.
- This device engages in the slot behind the switch toggle, blocking its operation. Adding a padlock prevents unauthorised operation and secures the device in place when the breaker is in the OFF position.

ES-TW-TH

Installed easily in 3 - steps

Switch of the MCCB & Insert the "TOGGLE HASP".

Slide it inwards.

Place the Locks in the matching holes.

MULTIPURPOSE CABLE LOCKOUT

Cable lockouts are ideal for situations where there is a need to lockout multiple energy sources with one device or where the design / placement of the energy sources prevents other types of lockouts from being used.

The design and flexibility of a cable lockout device allows it to be used in a variety of settings. The flexible cable is looped around or through the isolating point and then secured. The lockout device holds the cable firmly and prevents it from loosening. This prevents the energy-isolating device from being activated until the cable is removed. Several padlocks can be applied on the device to ensure the safety of workers.

They are flexible, cost-effective, easy-to-use, and are just as efficient as chains but are much lighter and visible.

LTTLOCK
LOCKOUT • TAGOUT • TRYOUT

ECONOMY MULTIPURPOSE CABLE LOCKOUT

- Constructed from durable polypropylene material.
- Injection moulded one-set construction includes a stainless-steel nut and bolt for corrosion resistance and long-lasting performance.
- Supplied with a 2-meter galvanized vinyl coated steel cable.
- Lockout valves, switches, and other similar applications with this cable lockout, providing a quick and simple method for securing difficult equipment.
- Patented easy GRIP & TWIST design for user convenience.
- Accepts up to 6 padlocks, allowing for multiple lockout applications.
- Withstands temperatures ranging from +55°C to -20°C.
- Cable can be ordered in 2, 5, 10, 20, 50, or 100 meters.

## HANGING TWISTER UNIVERSAL MULTIPURPOSE CABLE LOCKOUT

- Designed to secure multiple energy isolation points & difficult-to-secure isolating devices.
- Manufactured from impact-resistant copolymer polypropylene for durability.
- Injection moulded one-set construction includes a stainless-steel nut and bolt for corrosion-free, long-lasting performance.
- Withstands harsh weather conditions ranging from +85°C to -20°C.
- Comes complete with a 2-meter 4mm PVC coated, heavy-duty steel cable.
- Cable can withstand weights exceeding 100kg.
- PVC coated, heavy-duty steel cable available in rolls of 2, 5, 10, 50, or 100 meters.
- Standard colour is red; other colours are available upon request (*MOQ applicable).

No tools required.

ES-**UMCL-HT**

ES-**UMCL-HT+2C**

Hanging provision to place the device on shadow boards easily.
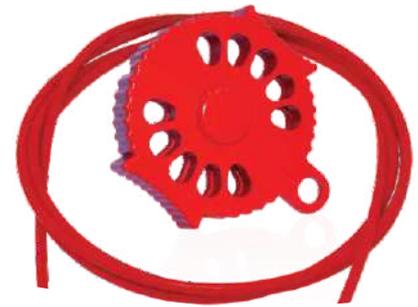

Patented easy-grip twist design; users can quickly tighten the twister wheel using their fingers.

Its unique design does not allow the tightening twister wheel to come off the base unit, preventing accidental loss.

6 HOLE HASP ADJUSTABLE MULTIPURPOSE CABLE LOCKOUT

ES-6H-HAMCL+2C

The 6 Hole integrated hasp and multipurpose cable lockouts provides the versatility of a cable lockout to isolate multiple energy isolation points and the benefits of a hasp to accommodate several personal locks during group operations.

- Lightweight ABS construction for easy handling, carrying, and operation.
- Device includes a vinyl-coated steel cable for secure locking.
- Easy installation: Feed the cable through the multiple isolation points and thread it back through the device to close the loop. Pull the cable tightly to maximize tension and hold isolation points in the off position. Squeeze the lockout device to tighten the cable and apply a lockout padlock to secure the device.
- Accommodates up to 6 padlocks for enhanced security.
- Cables can be ordered in different lengths: 4m, 6m, 8m, or 10m.
- Standard colour is Red for increased visibility.

ECONOMY METALLIC MULTIPURPOSE CABLE LOCKOUT

- Made of Brass/Stainless Steel for long-lasting performance. (Non-corrosive)
- Each device includes a 2-meter-long stainless-steel cable with the locking device.
- The cable is securely clamped using a tamper-proof screw with the special key provided.
- Stainless-Steel Cable Lockouts are highly durable and resistant to rust or corrosion.

Step 1: Prepare and Thread the Cable

Open the cable lockout device to its unlocked position, ensuring the cable is ready for use. Thread the cable through all necessary isolation points on the equipment or machinery, ensuring full coverage of energy control points.

Step 2: Close the Loop

Feed the cable back into the lockout device, closing the loop around the control points. Pull to tighten, ensuring there's no slack and all isolation points are securely enclosed within the loop.

Step 3: Secure the Cable in Place

Use the special key provided to tighten the cable lockout device, ensuring it grips the cable firmly and prevents any movement or loosening.
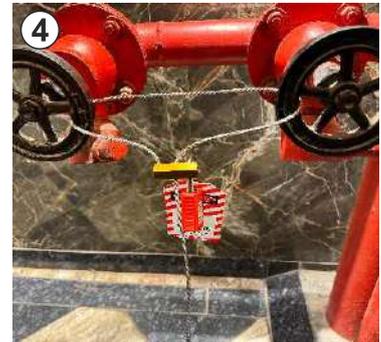

Step 4: Perform Lockout

Apply a padlock through the designated locking hole to secure the lockout device and affix a tag detailing the lockout information. Store the key in a secure location to maintain the integrity of the lockout.

ENERGY SECURE
CABLE LOCKOUT

Before

After

- A ground breaking innovation from **LTTLock** revolutionizing global energy isolation safety practices.
- Designed for electrical or mechanical energy isolating points, particularly those with protruding sections, it is a versatile and robust lockout device.
- It features a seamless one-piece design that allows for quick and effective installation, demanding no additional tools. Simply place the lockout over the valve stem or electrical point, route the cable, secure with the ergonomic twister cap, and apply lockout padlock(s).
- Additionally comes with a separate storage bag for safekeeping of essential machine components, preventing any misplacement and unauthorized access. (*Additional Charges Apply)
- Equipped with an **additional bottom rubber grip** for smaller lockout points to ensure a secure fit.
- Features eight holes to accommodate multiple authorized personnel to secure the lockout with their individual padlocks, with a maximum shackle diameter of 9mm.
- Once secured with a lockout padlock, the device prevents accidental or unauthorised reactivation, enhancing your workspace's safety.
- Constructed with durable PP and stainless-steel to resist cracking and abrasion, ensuring longevity.
- Built to endure extreme weather conditions and temperature variations, perfect for outdoor applications.
- Available in a standard red colour with a contrasting black cap.
- Versatile usage, capable of securing manually operated plug valves with stem diameters ranging from 23mm to 63mm.

Valve lockouts are simple and effective in order to prevent unauthorized operation of valves.

Valves come in a huge range of shapes, sizes and methods of operation. Whether you have Ball Valves, Gate Valves, Plug Valves, Globe Valves or Butterfly Valves; their method of operation determine the lockout device for the valve.

Several valves are manually operated via a handwheel / lever / wrench or the valve might be power actuated e.g. electric motor, hydraulic or pneumatic actuator. Regardless of the method of operation, all valves can be locked out by our various available lockout solutions.

METALLIC GATE VALVE LOCKOUT

- The Metallic Gate Valve Lockout from **LTT Lock** sets new industry standards with its exceptional strength, versatility, advanced design, and superior performance.
- Crafted from virtually indestructible steel, these valve covers are built to withstand even the harshest environments and toughest conditions.
- The unique design of our lockout allows it to rotate freely around the hand wheel once locked, effectively preventing unauthorized access and operation of the valve.
- Available in five different sizes, in red colour.
- Padlock holes are available in each gate valve lockout device.
- Designed for quick and effortless installation.
- The unique knockout center of the lockout device is designed to accommodate rising stem valves.
- Hasps and padlocks can be used to lock these lockouts.

ADJUSTABLE GATE VALVE LOCKOUT

- Ultimate solution for securing gate valves of various sizes. To use, simply clip the two sections apart and fit around the valve, then attach up to four/five padlocks (sold separately).
- Can be easily adjusted to fit gate valves with hand wheel diameters ranging from 25 mm to 165 mm (1" to 6.5").
- Once secured, the lockout covers the valve's wheel and rotates freely around it, preventing unauthorised operation.
- Made from highly durable polypropylene and ABS materials, this lockout device is built to withstand tough industrial environments.
- Works in temperatures from -20°C to 90°C.
- Compact design for easy carrying and storage.
- A special cut-out section in the middle of the lockout is designed to let the rising stem of the valve through.

BALL VALVE LOCKOUT

- Ideal solution for securing ball valves and preventing unauthorized operation.
- Designed for effortless installation and operation. Simply clamp them over the valve lever to prevent the valve from being operated. The BV-01 model can lock small-sized valves in both open and closed positions, while the BV-01-EX / BV-02-L models are used specifically for closed position lockout.
- Our two-piece moulded lockouts are designed to fit most ball valves available internationally. The inner slider provides a secure grip on the valve handle sleeves inside the cover, ensuring a tight and reliable lockout.
- Strong polyurethane plastic construction means they are virtually indestructible. This ensures excellent resistance to cracking, abrasion, and impacts, making them suitable for even the most demanding industrial environments.
- They are resistant to extreme weather & temperature conditions.
- Non-conductive. Available in 4 different colours.

TOP RAIL BALL VALVE LOCKOUT

- Our lockout devices are designed to lock ball valves in either the open or closed position. The Small size can lock valves in both positions, while the Large size is specifically designed for locking valves in the closed position.
- The lockout device easily slides onto the valve's lever, providing a secure fit and allowing for efficient lockout procedures.
- Lockout devices have provisions for attaching up to six padlocks (padlocks not included).
- Can withstand harsh industrial environments.

This product is available in two sizes:

- **ES-TR-BVL-S:** Small Size - for ball valves with diameter from 0.5 inches to 1.25 inches, Max Handle Length 8 inches, Pipe Diameter from 12.5 to 31mm.
- **ES-TR-BVL-L:** Large Size - for ball valves with diameter from 2 inches to 8 inches, Max Handle Length 10 inches, Pipe Diameter from 50 to 200mm.

PLASTIC BALL VALVE LOCKOUT

ES-2PP-SBVL

- Designed to lock quarter-turn ball valves in the "OFF" position, ensuring that the valve lever cannot be turned and the valve remains securely closed. This prevents accidental activation and enhances safety during maintenance and repair work.
- The lockout is made from super tough PVC, providing excellent durability and resistance to harsh industrial environments.
- Standard colour is Red.
- Available in 3 other colours - Yellow, Blue, and Green (*Minimum Order Quantity - 200 units).
- Once the device is placed over the valve handle, complete the installation by tightening the device using a screwdriver.
- The devices feature eight holes that enable multiple authorized personnel to secure the lockout with their individual padlocks. The maximum shackle diameter is 7mm, ensuring compatibility with a wide range of padlocks.

ES-CTBVL	Clamp Type Ball Valve Lockout Device

SETTABLE BALL VALVE LOCKOUT

- Used for precise locking & closing / opening of the ball valves of various sizes and makes.
- Constructed from super tough nylon and stainless steel to avoid corrosion. Designed to lock out quarter-turn valves of varying sizes and geometric handle dimensions (round, square or flat) up to 1 - 1/4" thick x 1-5/8" wide and various lengths. Valves can also be locked in the ON or fixed positions for non lockout applications. To freeze the valve handle at an exact location attach the second arm (sold separately) to lock handle of 2 / 3 / 4 or 5 way valves.
- Ideal for all kinds of usage areas / pipelines like gaseous, oils, liquids, air pressure pipes & valves etc.

UNIVERSAL VALVE CABLE LOCKOUT

- This lockout device is versatile, rugged, and user-friendly, suitable for securing a broad array of mechanical devices.
- Features an open-ended clamp that can accommodate closed rings, wide handles, large levers, T-handles, and other challenging mechanical devices.
- Constructed using special PVC grade with stainless-steel components, ensuring durability, chemical resistance, and corrosion resistance.
- Designed with modular construction, allowing for the addition of various accessories to adapt to different valve types and sizes.
- Multi-functional, capable of use with two blocking arms for locking out 3, 4, or 5-way valves, effectively preventing unauthorized operation.

Use as a Butterfly Valve Lockout

ES-**UVL**

The clamp fastens tightly to the butterfly valve lever, blocking the trigger handle from being engaged and halting valve repositioning. This guarantees the valve stays locked during maintenance or repairs.

ES-**UVL**

ES-**UVL+C**

Add a cable attachment to lock gate valves in on / off or set position.

Use as a Gate Valve Lockout

ES-**UVL+C**

By adding a cable attachment, this lockout device can reliably secure gate valves in the on/off or a specific set position. The arms and vinyl-coated steel cable offer a robust and secure lockout method for gate valves.

ES-**UVL-L**

* Extended Small & Extended Large Arms are also available.

BUTTERFLY
VALVE LOCKOUT

When slid into position, the wedge on the slider section prevents the compression handle from being squeezed, preventing operation of the valve. Padlock is placed through the holes to ensure proper lockout. Hasps maybe used when multiple locking is required.

- Designed to lock most kinds of butterfly valves in the industries.
- Resistant to cracking and abrasion. Highly resistant to solvent and other chemical products.
- Standard colour is Red. Other colours are available on request (*MOQ Applicable).
- Made of strong polypropylene plastic; Fully de - electric (non - conductive).
- They are resistant to extreme weather and temperature conditions making them suitable for outdoors.

PREMIER BUTTERFLY VALVE LOCKOUT

- A high-quality lockout device designed to effectively lock most types of butterfly valves commonly found in industrial settings.
- The lockout device features a slider section with a wedge that, when slid into position, prevents the compression handle from being squeezed, effectively preventing the operation of the valve. This mechanism ensures that the valve remains securely locked in the desired position, providing a reliable lockout solution.
- Made with a combination of ABS, Nylon, Stainless Steel, and Brass inner components, this lockout device offers durability and strength.
- Lockout device is highly resistant to cracking and abrasion. It can withstand the rigors of industrial environments, ensuring long-lasting performance and reliability.
- The lockout device is highly resistant to a wide range of solvents and chemical products commonly found in industrial settings.
- The Premier Butterfly Valve Lockout is available in two colours – Red and Yellow.

ENERGY SECURE
CABLE LOCKOUT

Before

After

- A ground breaking innovation from **LTTLock** revolutionizing global energy isolation safety practices.
- Designed for electrical or mechanical energy isolating points, particularly those with protruding sections, it is a versatile and robust lockout device.
- It features a seamless one-piece design that allows for quick and effective installation, demanding no additional tools. Simply place the lockout over the valve stem or electrical point, route the cable, secure with the ergonomic twister cap, and apply lockout padlock(s).
- Additionally comes with a separate storage bag for safekeeping of essential machine components, preventing any misplacement and unauthorized access. (*Additional Charges Apply)
- Equipped with an **additional bottom rubber grip** for smaller lockout points to ensure a secure fit.
- Features eight holes to accommodate multiple authorized personnel to secure the lockout with their individual padlocks, with a maximum shackle diameter of 9mm.
- Once secured with a lockout padlock, the device prevents accidental or unauthorised reactivation, enhancing your workspace's safety.
- Constructed with durable PP and stainless-steel to resist cracking and abrasion, ensuring longevity.
- Built to endure extreme weather conditions and temperature variations, perfect for outdoor applications.
- Available in a standard red colour with a contrasting black cap.
- Versatile usage, capable of securing manually operated plug valves with stem diameters ranging from 23mm to 63mm.

Streamline safety procedures with our **LTT Lock** Pull Handle Butterfly Valve Lockout, a testament to innovation and industrial security. This durable device, constructed to withstand rigorous use, is versatile for diverse applications across pharmaceuticals, food, and beverage sectors, or any system employing butterfly valves.

With an easy-to-operate design, this lockout clamps swiftly and securely onto valve handles, ensuring they remain fixed in the desired position, thereby preventing unintended operation.

Recognizing that industrial needs vary, our lockout devices are available for butterfly valves of different sizes and handle dimensions. They allow for a perfect fit, ensuring maximum safety and compliance with industry regulations.

Adhere to OSHA lockout/tagout protocols with confidence by integrating our robust, stainless steel lockout solutions into your safety regimen.

STAINLESS STEEL BUTTERFLY VALVE WITH PULL HANDLE LOCKOUT

- Designed to effectively secure pull handle butterfly valves commonly used in industries such as food and beverage, water utilities, chemical, and pharmaceutical.
- The lockout device allows you to secure the valve handle in any desired position, whether fully closed, partially open, or fully open, providing flexibility and control over the valve's operation.
- The lockout device consists of a circular spacer, cylindrical part, and end cap. These three pieces are easily installed on the valve handle rod, jamming the lever in the desired position and preventing any movement.
- The lockout device features holes that allow the installation of up to 3 padlocks.
- Constructed from strong polypropylene plastic; resistant to cracking, abrasion, and various chemicals, ensuring its durability and longevity in demanding industrial environments.
- Can withstand extreme weather conditions and temperature fluctuations, making it suitable for both indoor and outdoor use.

BLIND FLANGE LOCKOUT

The Blind Flange Lockout devices are best practice physical solution for pipeline maintenance. The adjustable cup allows for a secure fit that conceals and locks out access to nuts holding the blind flange in place.

Workers can perform maintenance with confidence because they know that the blind they have placed on a pipeline can not be removed until all the workers have removed their padlocks.

METALLIC BLIND FLANGE LOCKOUT

- The Blind Flange Metallic Lockout is a robust and versatile device designed to securely lockout blind flanges during maintenance or repair work.
- Fully conceals flange bolts preventing access to the blind until all work has been completed
- Adjustable device provides a tight fit, adapting to multiple flanged pipe applications.
- Durable red powder coated aluminium die cast construction of the caps and hardened steel customised rod withstand all kind of site conditions - indoors and outdoors.
- Versatile safety lockout devices secure the flange bolts of 0.5" to 24" diameter pipes.
- Available in Small, Medium & Large models, to suit different pipe diameters.
- Eight lockout holes of the hasp, allow multiple workers to lockout the device at one time.

BLIND FLANGE
LOCKOUT

STEP - 1

Start by placing the fixed side of the lockout device over the nut on one side of the blind flange.

STEP - 2

Slide the movable cap onto the nut on the other side of the blind flange.

STEP - 3A

For single locking, you can install a padlock either in the rod provided with the lockout device or through the movable cap by penetrating the rod.

STEP - 3B

For multiple locking, insert the hasp (ES-HDH-84-C) through the movable cap. Close the hasp and install multiple padlocks on it.

ES-P-BFL-S	Non-Metallic (PVC) Blind Flange Lockout - Small (Pipe Size 3-3/4" - 10-3/4")

A cylinder lockout is a safety device specifically designed to prevent unauthorized access to and use of cylinders. These are crucial in environments where hazardous gases are stored or used, such as laboratories, industrial plants, and manufacturing facilities. They work by enclosing the valves or controls of a cylinder, rendering it impossible to open or operate the cylinder without unlocking the lockout device.

In our range you'll find a variety of gas cylinder lockouts, designed to fit different sizes and shapes of cylinders and their associated valves.

CYLINDER LOCKOUT

- The Cylinder Lockout is a device designed to prevent unauthorized access to the valve handle of a cylinder.
- The lockout is made of polystyrene and is designed for easy and quick application. It can be installed in seconds, providing immediate protection.
- The lockout is secured in place with two interlocking plates, enhancing its effectiveness and preventing tampering or removal.
- The device can accommodate up to 3 padlocks.
- The inner size of the lockout is 85 mm in diameter and 150 mm in depth, providing sufficient space to accommodate most standard cylinder valves. The stem hole has a diameter of 35 mm, allowing for proper fit and functionality.
- The lockout provides quick and easy identification of whether the cylinder is full or empty.

ADDITIONAL USE OF CYLINDER LOCKOUT

In addition to locking out cylinders, the Cylinder Lockout can also be used for locking out Plug/Globe valves. To secure the device in place on a valve, use an ES-EML (Cable Lockout) with a 2.5-meter cable.

Here's how to apply the lockout:

1. Pass the cable of the ES-EML around the valve body and through the hole of the Cylinder Lockout (VCLO).
2. Tighten the cable to ensure a secure fit around the valve.
3. Place the padlocks on the ES-EML to secure the lockout device in place.

Pneumatic systems, which use compressed air or gas to perform work, are commonly found in many industrial settings. These systems, like other mechanical and electrical systems, can pose serious risks if not properly controlled.

The pneumatic lockout device typically works by blocking the line or connection that supplies compressed air to the system. It does this by fitting over or plugging into the male pneumatic fitting. Pneumatic lockout devices come in various shapes and sizes to accommodate different types of pneumatic fittings and connections.

LTTLOCK
LOCKOUT • TAGOUT • TRYOUT

3 WAY PNEUMATIC LOCKOUT

ES-**PL-3W**

- 3 Way Pneumatic Lockout is designed to isolate pneumatic energy and prevent re-attachment of male fittings.
- Applied directly to the male fitting to isolate equipment from compressed air sources.
- Compatible with 6.35mm, 9.52mm, and 12.7mm male fittings.
- Features multiple holes for attaching padlocks, ensuring secure installation.
- Eliminates the need for in-line lockout valves, saving time and cost.
- Center hole allows for convenient storage on an air hose.
- Accommodates padlocks with up to 6mm shackle diameter.

BOX TYPE PNEUMATIC LOCKOUT

- Box Type Pneumatic Lockout is designed to accommodate a wide range of electrical plugs and male air hose connectors.
- Effectively prevents the use of male air hose connectors and plugs until the lock is removed.
- Compatible with plugs up to 89mm in diameter and 127mm in length.
- Suitable for use with 110V, 220V, and 550V plugs.
- Made of durable Polystyrene / ABS material.
- Standard Colour is Red.
- Accepts up to 4 padlocks with a maximum shackle diameter of 7mm.
- **Dimensions: The small lockout box has dimensions of 50 H x 86 L x 50 W mm, with a 13mm diameter hole for the cable. The large lockout box measures 94 H x 162 L x 94 W mm and has six holes with 9mm, 11mm, 11mm, 12mm, 13mm and 20mm diameter respectively for the cable.**

STAINLESS STEEL
PNEUMATIC
LOCKOUT

- The Stainless-Steel Pneumatic Lockout is uniquely designed to fit on all pneumatic fittings commonly used in manufacturing facilities.
- It effectively prevents pneumatic fittings from being reconnected to a pressurized air source.
- Made from strong and durable stainless steel solid sheets, providing excellent corrosion resistance.
- Easy to use - place it over the male fitting and secure it with a padlock.
- Device can lockout multiple pneumatic devices simultaneously.
- Designed for use with male fittings with a diameter ranging from 7mm to 20mm.
- Compact dimensions of 35mm wide x 196mm tall x 3mm thick.
- Accepts padlocks with up to 8mm shackle diameter for secure locking.

ROUND PNEUMATIC LOCKOUT WITH 5 HOLES

- Easily and quickly lockout pneumatic energy devices without inconvenient in-line valves or costly tool modifications.
- When installed on the male pneumatic fitting, it prevents the ability to engage into the female fitting.
- Universal compact design makes the pneumatic lockout device easy to transport and install on almost any fitting, even in tight spaces.
- Rugged stainless-steel construction offers superior strength, durability, added security and corrosion resistance.
- Overall dimensions are 3.5" (88.9mm) diameter x 0.10" (2.54mm) thick.
- Features two padlock holes of diameter 0.33" (8.38 mm), in order to work with a broad range of padlocks.

A plug lockout is a safety device that is designed to prevent electrical plugs from being inserted into a wall outlet, power strip, or any other power source. These are highly important in situations where electrical equipment needs to be serviced, repaired, or maintained, or when the person doing the work does not have exclusive control over the plug. These lockouts function by enclosing the plug in a box or pouch and then applying a padlock to secure it.

Plug lockouts are available in different shapes and sizes to accommodate a wide range of plug types and sizes.

BOX TYPE ELECTRICAL PLUG LOCKOUT

- The Box Type Electrical Plug Lockout is designed to provide a secure enclosure for electrical plugs, preventing accidental reconnection and unauthorized use.
- The lockout boxes are manufactured from durable ABS material.
- The lockout box features a hole(s) through which the cable can be fed, allowing the plug to remain safely enclosed.
- The small unit is suitable for 110V plugs and electrical connections up to 40 mm in diameter.
- The large unit is designed to accommodate standard and larger electrical plugs, 220V/500V plugs, and 3 phase connectors.
- Can accommodate up to 4 safety padlocks.
- **Dimensions: The small lockout box has dimensions of 50 H x 86 L x 50 W mm, with a 13mm diameter hole for the cable. The large lockout box measures 94 H x 162 L x 94 W mm and has six holes with 9mm, 11mm, 11mm, 12mm, 13mm and 20mm diameter respectively for the cables.**

MOLDED PLUG LOCKOUT DEVICE

The Molded Plug Lockout Devices, both in small and large sizes, are crucial safety tools designed to prevent molded electrical plugs from being inserted into outlets, protecting workers from accidental start-ups during maintenance or servicing work. They're particularly crucial when the plug isn't under the exclusive control of the technician or the maintenance personnel.

- They can lockout almost all standard plugs and connectors, ensuring a broad range of industrial applications.
- Made of bright red polypropylene for visibility and durability.
- Both sizes are designed to house up to 4 padlocks (not included), and can accept padlocks with shackles up to 9mm in diameter, ensuring multiple personnel can collaborate in the safety procedure.
- The sliding lock feature offers a two-step locking process for enhanced safety.
- Operating temperature ranges from 60°C down to -19°C.
- Designed to meet OSHA Lockout/Tagout regulations.

Compatibility:
- **Small**: Fits plugs up to 70mm dia. x 120mm length (cable dia. up to 28mm).
- **Large**: Suitable for plugs up to 115mm dia. x 257mm length (cable dia. up to 35mm).

PLUG COVER LOCKOUT

- An effective solution for locking out hanging control panels, plug sockets, and pendants.
- The cover is made of special-grade non-tearable fabric, ensuring durability and longevity.
- Features a black leather belt that is riveted onto the fabric cover. This belt can be used to tighten the cover around the device being locked out.
- The cover has provisions for attaching padlocks, providing additional security and preventing unauthorized access to the locked-out device.
- Large Plug Cover Lockout is designed for larger plugs, pendants, and crane operation devices.
- **PVC Pipe Insert (Optional):** Upon request, the lockout can be supplied with a solid PVC pipe insert of suitable diameter. **This insert helps prevent unintended operation of control buttons, such as those on hoists or cranes, by covering them and adding an extra layer of protection.**

RED PLUG LOCKOUT

ES-RPL-UK

- The Universal Red Plug Lockout is a simple and compact device designed to prevent appliances and electrical equipment from being plugged in during maintenance or when they are deemed hazardous or faulty.
- Suitable for locking out Type G plugs aka 'The commonwealth plug'. They are widely used in the UK, Ireland, Hong Kong, Singapore, Cyprus, and Malta.
- The lockout device is designed to fit most UK, 13A plugs.
- Durable plastic construction.
- The lockout device is easy to install. Simply place it over the plug and ensure it covers the prongs, preventing the plug from being inserted into a socket.
- To ensure complete lockout a padlock must be installed on the lockout device (padlock sold separately).
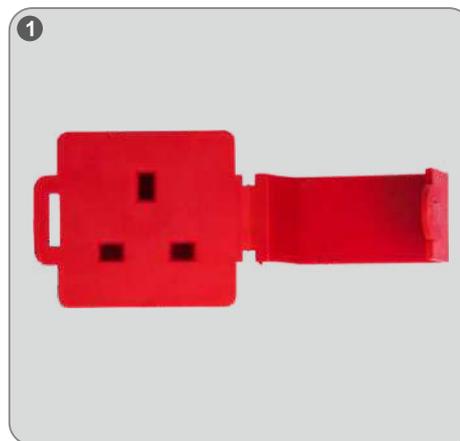

Step 1: Position the lockout device open, aligning it with the plug's prong orientation.

Step 2: Insert the plug fully into the lockout device.

Step 3: Close the lockout device, ensuring it aligns into the locking space.

Step 4: Secure the device with a padlock through the hole provided to prevent access.

Preventing Unintentional Plug Connections with our Secure Plug Lockout Devices !

LTTLOCK
LOCKOUT • TAGOUT • TRYOUT

Pin and sleeve plug/socket lockouts are safety devices used in electrical systems to prevent unauthorized access or accidental usage of electrical plugs or sockets. These devices work by enclosing or blocking access to the plug's prongs or the socket's openings, rendering them inoperable until the lockout device is removed.

PIN & SLEEVE
SOCKET LOCKOUT

The Pin & Sleeve Socket Lockout is a device designed to effectively lockout electrical sockets to prevent unexpected start-up of equipment during maintenance and repair work.

FEATURES :

- Simply insert the locking device into the female socket, bring over the socket flap to hold it in place, and lock it with a suitable lockout hasp and padlock.

- OSHA Lockout / Tagout regulation 29CFR 1910.147 Compliant.

- The **ES - P&S - SL** is available in four sizes to accommodate a range of electrical plug designs and ratings, from 110V, 16 Amp to 400V, 63 Amp.

- Discourages unauthorized use of tools and equipment.

- Made in high-visibility red colour for easy identification.

- Made from polypropylene, the lockout device is reusable and durable, ensuring long-lasting performance and reliability.

- Supports good practice in the control of hazardous energy and Lockout Tagout procedures .

PIN & SLEEVE PLUG LOCKOUT

- The Pin & Sleeve Plug Lockout is designed to prevent the insertion of plugs into energy sources for effective energy isolation.
- The device is attached to the outer circular wall of the male plug, securing the protruded portion of the plug wall. This prevents the plug from being inserted into the socket.
- **Suitable for all plug sizes, making it a versatile solution for various applications.**

Circuit breaker lockouts are safety devices that help prevent accidental or unauthorized operation of a circuit breaker. They work by physically blocking the circuit breaker's switch from being turned on, essentially locking it in its OFF position. The objective is to ensure the safety of personnel who might be working on the circuit or equipment powered by it. In particular, it helps to prevent electrical shocks, electrocution, or even explosions that could occur if the circuit is unexpectedly energized.

There are several types of circuit breaker lockouts, each designed to fit different types and models of breakers. The type of lockout device to be used is typically determined by the design and size of the circuit breaker and the specific requirements of the Lockout Tagout procedure.

MINIATURE CIRCUIT BREAKER LOCKOUT

- Simple to use: Simply switch off the MCB, push the button on the device to extend the pin prongs, and attach to the MCB before releasing the button and attaching a padlock to fully secure the lockout.

- No tools required for installation; the device fully secures the MCB, preventing it from being energized until the lockout is removed.

- The Tie Bar & MCBL offers a degree of universality and serves as a safe and effective method for locking out Miniature Circuit Breakers.

- The Tie Bar style lockout features a convenient thumb wheel for quick application on multiple breakers.

- Lockouts can be used on single and multi-pole breakers that are operated with a tie-bar.

PREMIER MINIATURE CIRCUIT BREAKER LOCKOUT

- Specifically designed for use on miniature circuit breakers, effectively preventing accidental reactivation and ensuring the switch remains locked in place.
- Easy installation process: Slide down the toggle to pull apart the pins, insert the lockout inside/around the desired small holes located on either side of the MCB switch toggle, release the pins to secure in place, and then attach a padlock (padlocks sold separately) for additional security.
- No tools required for installation; the device fully secures the MCB, preventing it from being energized until the lockout is removed.
- Suitable for application on both single and multiple breakers, offering versatility in lockout scenarios.

EUROPA MINIATURE
CIRCUIT BREAKER
LOCKOUT

- The Europa MCB lockout device is constructed of durable nylon material and is designed to fit most modern breakers.
- Capable of locking MCBs, RCBOs, RCCBs, and main switch isolator, including the Merlin Gerin MG 26970 for C60 miniature circuit breaker, in both the 'ON' and 'OFF' positions.
- The device features wire clips that engage behind the toggle of the circuit breaker, securely holding it in place.
- Once fitted, the lockout device can be secured with a safety padlock (sold separately) to prevent unauthorized operation.
- Can accommodate 1 lockout padlock with up to 8 mm shackle dia.

SCHNEIDER CIRCUIT BREAKER LOCKOUT

- Designed to be applicable to a variety of miniature circuit breakers, commonly used for locking Schneider miniature circuit breakers.
- Easy locking mechanism: Slide your fingers lightly to clamp the stainless-steel pin onto the small holes on both sides of the circuit breaker toggle, allowing for easy lockout without the need for tools.
- Constructed from durable nylon material, ensuring long-lasting endurance and strength.
- Suitable for installation on both single-pole and multi-pole breakers.
- Accommodates padlocks with a shackle diameter of up to 6.5mm.
- Padlock must be installed to fully secure the lockout (padlocks sold separately).

ES-**SCBL-Y**

Install device in OFF position

1. Switch off the MCB

UNIVERSAL GOLDEN TOGGLE MCB LOCKOUT

- The simplest yet most versatile MCB lockout in our range.
- It easily fits over most MCB switch toggles and can be secured in place using a small flat blade screwdriver to turn the grub screw.
- Once tightened and secure, a padlock or hasp can be inserted to block access to the grub screw, ensuring that the device cannot be removed until the lock is removed.
- This lockout works effectively even in situations where other types of circuit breaker lockouts may not be suitable, such as PIN IN/PIN OUT/PINOUT WIDE configurations.

MODEL	PRODUCT DESCRIPTION
ES-UGT-MCBL	Universal Golden Toggle - Miniature Circuit Breaker Lockout

MULTI POLE CIRCUIT BREAKER JAMMER LOCKOUT

- This jammer lockout device designed for multi-pole circuit breakers.
- It is made of a special mix of aluminium, ensuring durability and strength.
- The lockout device is supplied with stainless steel screws for secure installation.

SLIM LINE
MINIATURE CIRCUIT BREAKER LOCKOUT

- Specifically designed for MCBs where access is limited by breaker test buttons or limited clearance around the device.
- Padlock should be applied to fully secure the lockout and prevent operation of the MCB (padlocks sold separately).
- This lockout device is designed to fit a wide range of MCBs, RCBOs, fuse carriers, and main switches, ensuring versatility and compatibility.
- The slim line design is less than half the width of a standard MCB lockout and around 30% shorter, making it perfect for situations where clearance around the breaker is limited.

BREAKER LOCKOUT

ES-**TS-SPBL**
Rounded Version

ES-**MPBL**

ES-**SPL**

ES-**DPL-L**

ES-**UMP-BL**

ES-TS-SPBL: This lockout is designed to fit directly onto the switch of a circuit breaker. It is mounted over the "off" position switch and secured with a padlock. It is compatible with most major brand single-pole breakers.

ES-MPBL: This circuit breaker lockout is designed for voltage levels of 120/277V and requires the breakers to be connected with a crossbar.

ES-SPL: This is a single-pole lockout that does not require a circuit breaker with a recessed hole. "No Hole" Circuit Breaker Lockout is made of durable polycarbonate material and is designed to fit circuit breaker toggles up to 1/2" wide without a recess hole in the toggle.

ES-DPL-L: This is a double-pole lockout, similar to the MPBL but slightly larger to accommodate larger breakers. It is available for both single and double pole circuit breaker lockout applications.

ES-UMP-BL: This clamp-on type circuit breaker lockout is designed to be used with most major multi-pole breakers that employ a tie bar. It is made of durable glass-filled nylon with a stainless-steel screw. It is compatible with most branded manufacturers such as GE, ITE, Sylvania, Cutler-Hammer, Challenger, Bryant, Siemens, Square D, and General Switch Company. It is suitable for 120/277V circuits. To use, simply secure the clamp lockout over the tie bar by tightening the thumbscrew and insert a padlock to prevent the clamp from being loosened.

CLAMP ON
BREAKER LOCKOUT
LARGE - ROUND

- Made from high-quality engineering-grade nylon/ABS plastic.
- Features a self-contained stainless-steel screw attached to a round twister handle, allowing for easy tightening of the lever of circuit breakers.
- Can be easily operated without the need for any tools.
- Equipped with a 12-hole design that enables multiple workers to place their individual padlocks on the lockout device simultaneously.
- Works effectively on a wide range of single-pole and internal-trip multi-pole breakers.
- Accommodates locks with shackles up to 8mm in diameter.
- Can fit on breaker switch levers with a width of up to 60mm and a thickness of up to 20mm.

ES-**RCOBL**

Brass threaded insert is used for smooth operation of screw.

GRIP TIGHT CIRCUIT BREAKER LOCKOUT

- **Available in two sizes: the small one fits standard height and tie-bar toggles typically found on 120 and 240 volt breakers, while the bigger one fits wide/tall breaker toggles typically found on high-voltage/high-amperage breakers.**
- The universal fit exclusive design accommodates many styles of breaker toggles.
- Adjust to breaker with simple thumb turn and then close clamping handle for a tight grip on the toggle, allowing for a secure mounting for a solid lockout.
- Compact design allows for side-by-side breaker lockout, making efficient use of space. These compact devices are also easy to carry and store.
- Made of durable reinforced polymer construction, ensuring reliability and performance even in harsh conditions.

LARGE CIRCUIT BREAKER LOCKOUT

- The Large Circuit Breaker Lockout is specifically designed to lock out a wide range of three-phase circuit breakers with a voltage rating of 227V and above.
- It fits on the lever of a circuit breaker up to 3" wide and 0.9" thick, providing a secure locking mechanism.
- The lockout effectively prevents the circuit breaker from being turned on or operated while maintenance work is being performed.
- The lockout is made of rugged stainless steel and PVC constructions, providing durability and resistance to corrosion.
- Installation is straightforward; simply turn the screw into the circuit breaker handle and add your own LOTO padlock and tag.

SIDE SCREW
CIRCUIT BREAKER LOCKOUTS

- Designed to provide a safe and effective method for locking out a variety of critically made circuit breakers.
- Made of a special grade alloy and ABS material, ensuring durability and reliability.
- Easily install using the stainless-steel twister screw, providing a secure and tight fit.
- The brass pherol provides extra durability and strength to the lockout device, enhancing the grip of the internal screw.
- Can be installed on a variety of circuit breakers from different companies, making them versatile and compatible with various types of breakers.
- To secure the lockout, a padlock should be applied, preventing unauthorized operation of the circuit breaker.

MOTOR PROTECTION CIRCUIT BREAKER LOCKOUT

Safeguard your operations with the ES-UMPCBL Universal Motor Protection Circuit Breaker Lockout. This meticulously engineered safety device is crafted to provide a universal solution for a wide variety of motor protection circuit breakers (MPCBs), offering unparalleled compatibility across numerous models and manufacturers.

- **Dual-Grip Technology:**

Incorporates a robust two-part mechanism that clamps onto the MPCB's external surfaces, delivering a firm and non-slip lockout.

- **Resolute Lockout:**

Once fastened and padlocked, the device encases critical switch components, effectively preventing inadvertent or unauthorized actuation of the MPCB.

- **Tailored Design:**

Precisely calibrated to accommodate all MPCB switches with a switch panel height of up to 45 mm, ensuring a consistent and controlled lockout process.

- **Compliance:**

Meets rigorous industry safety standards, assisting in compliance with OSHA lockout/tagout regulations.

MOTOR PROTECTION CIRCUIT BREAKER LOCKOUT

STAINLESS STEEL GRIPPER

ES-**U-MPCBL**

- The lockout is designed to universally fit most motor protection circuit breakers, ensuring compatibility with various models and brands.
- A two-part riveted model that securely grips the outer surface of the motor protection circuit breaker or switch.
- To lockout the device, simply turn the black handle 90 degrees, allowing the device to clamp onto the circuit breaker or switch.
- Once the lockout is clamped and secured with a padlock, it prevents access to the motor protection rotatory, push-button, and other design switches on the MPCB.
- The lockout is specifically designed to accommodate all motor protection switches with a switch panel height of 45 mm

TWISTER MOTOR PROTECTION
CIRCUIT BREAKER LOCKOUT

- A reliable device designed to lock out motor protection circuit breakers (MPCBs) effectively.
- Made of a special grade alloy and ABS, ensuring durability and reliability in various industrial environments.
- Can be easily installed using the black twister located at the bottom of the device. Simply twist the twister to fasten the lockout to the MPCB.
- Features a brass pherol, which enhances the strength and longevity of the stainless-steel screw that holds the solid metallic component, ensuring a secure and robust connection to the MPCB.
- It is designed to be compatible with a variety of motor protection circuit breakers from different companies, offering versatility and convenience.
- Padlock should be applied to fully secure the lockout and prevent operation of the MPCB (padlocks sold separately).

WALL SWITCH LOCKOUT

- The Wall Switch Lockout is a device used to lockout wall-mounted switches.
- Designed to be easily installed using the existing screws of the wall-mounted switch, eliminating the need for additional installation hardware.
- It can lock the switch in either the "on" or "off" position.
- Available in high visibility red colour, making it easily noticeable and identifiable.
- Clear poly carbonate lockout uses existing wall plate screws to mount.
- Available in both hinge and non-hinge patterns, offering options to suit different types of wall-mounted switches.

LOCKOUT • TAGOUT • TRYOUT

A blocking bar lockout is a specialized type of safety device designed to restrict access to the oversized and irregularly shaped switches. They are also effective in locking out buttons, or touch screens on the digital panels of machines. The blocking bar lockout is typically mounted on an electrical panel or switch using a self-adhesive base, creating a physical barrier that prevents the operation of the switch or the underlying controls. The mechanism of a blocking bar lockout is simple yet remarkably efficient.

BLOCKING BAR LOCKOUT

- A specialized safety device designed to restrict access to buttons, switches, or touch screens on digital panels.

- The self-adhesive base are permanently attached to the electrical panel or switch. The base creates a track for the blocking bar, which can be easily slid across the controls to prevent operation.

- Easy installation: Just clean the surface and adhere; no drilling required.

- Fits a wide range of switches, including oversized or irregularly shaped ones.

- The locking bars are typically color-coded, with a red bar indicating a locked-off or inactive state, and a green bar indicating a locked-on or active state. This provides clear visual indication of the status of the controls.

- An effective, budget-friendly way to increase safety around computerized digital panels.

A fuse lockout is a safety device that's designed to prevent unauthorized or accidental placement of fuses in electrical systems. These devices are critical in environments where electrical systems require servicing or maintenance, or where specific fuses need to be isolated to prevent accidental operation of equipment.

There are many types of fuse lockouts available, each designed to fit different styles and sizes of fuses.

LTTLOCK
LOCKOUT • TAGOUT • TRYOUT

ROUND / BOTTLE FUSE HOLDER LOCKOUT

- The Round/Bottle Fuse Holder Lockouts are specifically designed to prevent unauthorized or accidental re-activation of power in fuse bases.
- They are placed into compatible fuse bases using a specially designed Operating Tool (Included).
- These non-conductive, red color lockouts withstand temperature range: -4°C to +121 °C.
- They are being made of ABS, PC & Steel / Brass components.
- The lockouts include space for the addition of a padlock, enhancing their security by preventing unauthorized removal.

ROUND / BOTTLE FUSE HOLDER LOCKOUT

- The Round/Bottle Fuse Holder Lockouts are specifically designed to prevent unauthorized or accidental re-activation of power in fuse bases.
- They are placed into compatible fuse bases using a specially designed Operating Tool (Included).
- These Non Conductive, Chemical resistant lockout device covers two common threads of DIAZED / NEOZED fuses:
  Suitable for :
  o ES-RFHLC-1 - E14 or E18 (NEOZED D01+D02)
  o ES-RFHLC-2 - E27 or E33 (DIAZED DII+DIII)
- For performing lockout, these red and yellow devices have a hole on top that allows for positioning a padlock with up to 6.5mm shackle diameter to secure the lockout.
- Includes a special black key provided at no extra charge, facilitating the easy application and removal of the lockout device.
- To prevent loss or misplaced keys, it is advised to store the keys with the padlock shackle (Check reference image).
- Optional cable padlocks are available for securing multiple fuses simultaneously.
- The device features a prominent "Danger - Do not operate" warning label to alert personnel and enhance visual compliance.

MODEL	PRODUCT DESCRIPTION
ES-**SGFP**	Safe Grip Fuse Puller

Electrical Panel Lockouts are critical safety devices utilized across various industrial and commercial environments. They are designed to provide safe and secure isolation of electrical energy during maintenance or repair of high-tension (HT) and low-tension (LT) electrical panels. The range of electrical panel lockout devices caters to a wide variety of electrical controls, including switches, Miniature Circuit Breakers (MCBs), Moulded Case Circuit Breakers (MCCBs), breakers, isolators, push buttons, emergency stops, levers, panel door knobs or locks, handles, and fuses.

If a suitable lockout device is not already available in the extensive range, custom solutions can be created. The user only needs to send the switch or relevant article to us and we will then design and produce a lockout device tailored to meet the specific requirements of that control point without obligation.

ELECTRICAL PANEL
LOCKOUT

The Electrical Panel Lockout is designed to address the need for locking out electrical panel buttons and switches that do not have built-in lockout provisions. These lockout units come in various designs, each with a 2-stage operation. The first stage involves attaching the base plate directly onto the electrical panel using strong adhesive backing, riveting, or bolting, ensuring it covers the relevant switch. Once the base plate is in place, the house unit can be placed over it, effectively isolating the electrical plugs, switches, or buttons. To secure the lockout, a lockout padlock can be applied.

The circular units are specifically designed to fit over universal-type push or mushroom panel buttons, while the square units are intended for switches with levers. For switches with extended handles, special patented lockout solutions are available to immobilize the switch at a specific angle for proper locking. These lockout units are adaptable to different panels with varying wiring, switch attachments, protruding levers, or unique shapes. They can be cut from any side or direction to accommodate the specific installation requirements.

Constructed from sturdy and transparent special-grade material, each unit fully encloses the electrical plug, preventing machines from being energized. The plug sits completely inside the unit, ensuring effective isolation. In cases where multiple units on a single panel need to be locked out, the use of the De Electric Squeezer lockout (ES-SMCL-YB) is recommended. This lockout features a yellow cable that can be fed through the access holes of the electrical lockouts and secured at one location by multiple users.

ELECTRICAL PANEL LOCKOUT (HINGED TYPE)

- An **LTTLock** innovative lockout device with a hinged design.
- Features a hinged housing unit that remains attached to the base.
- Virtually transparent, allowing for visibility.
- Designed to lock out electrical panel buttons and switches that lack inbuilt lockout capabilities, safeguarding against accidental activation.
- Attach the base plate firmly to the panel over the switch with adhesive backing, rivets, or bolts. The square housing with a hinge then covers the base, effectively isolating the switch. Attach a padlock and tag to complete the lockout.
- Customizable - Can be cut from any side/direction for diverse panel configurations.

FLEXI COCOON :
ROTARY SWITCH
COVER LOCKOUT

- Designed to prohibit access to a switch or control.
- Compatible with both **30.5 mm** and **22.5 mm** diameter switches.
- The clear bases and cover allow for visibility of nameplates and labels.
- The horse-shoe shaped retrofit base enables the use of raised nameplates and allows for off-centre installation to accommodate rotary switch knobs.
- Accommodates buttons up to **50 mm** in diameter and **45 mm** in height, providing compatibility with various switch sizes.
- Each Kit includes one cover, one new install base, and one retrofit base with double-sided adhesive tape for easy installation.

COCOON :
OVERSIZE PUSH
BUTTON LOCKOUT

- The Cocoon is a highly regarded lockout solution tailored for oversized electrical push buttons on electrical panels, control stations, and specific cranes and heavy machinery.
- Designed for quick and easy installation, it is placed over the push button to form a protective barrier against accidental energization.
- Composed of two parts, these are plugged together and then securely locked with a lockout padlock.
- The inner dimensions of the Cocoon are 70 mm in width and 85 mm in height, featuring a 30 mm diameter central hole to accommodate the push button.

GRIPPER LOCKOUT

- A safe and effective solution designed for locking out L & T breakers and other similar switches.
- It can be easily installed using the super strong adhesive backing.
- The lockout is suitable for both on and off positions of the switch.
- To lockout the switch, a padlock should be applied on the gripper.
- Has 26 x 31 mm space for locking the lever of the switch.

ES-GRIPPER

MODEL	PRODUCT DESCRIPTION
ES-GRIPPER	Gripper Lockout

SLIDER TOGGLE LOCKOUT

- The Slider Toggle Lockout is a multi-functional device designed to prevent accidental activation of large circuit breakers and flip lever style handle switches.
- Constructed from red de-electric ABS plastic, it comprises two components: a mounting base and a slider bar.
- Installation is straightforward, requiring either rivets or screws. The process involves drilling a hole in the panel body and securing the mounting base.
- The mounting base has a diameter of 2 inches. In contrast, the slider bar is 5 inches long and 1 inch wide, featuring a provision for attaching a lockout padlock to ensure the device is securely locked.

ELECTRICAL PANEL
HANDLE LOCKOUT

- The Electrical Panel Handle Lockout (EPHL) features a patented design specifically for immobilizing larger handles or levers on electrical panels. It features a yellow base and a 25mm x 300mm flexible, powder-coated stainless steel strip, equipped with 20 holes to provide a range of locking options.
- Once in place, the EPHL locks the handles using two yellow clamps and a lockout padlock, effectively preventing any movement or operation. This device is particularly valuable for handles and levers lacking an integrated lockout feature.
- Its robust construction guarantees long-term durability, significantly enhancing safety during maintenance or repair activities on electrical panels.

STAINLESS STEEL ELECTRICAL PANEL HOLE LOCKOUT

Before

After

- This die cut piece is made of stainless-steel sheet and is installed to the panel surface by using soft washer and rivet.
- Depending on the height of the panel door or installation pattern, a small or large sized right-angled padlock eye is used for lockout purposes.
- The device comes with a rubber washer, nut, screw, and a right-angled padlock eye.

TWIN LEG ELECTRICAL PANEL HOLE LOCKOUT

Before

After

- A three-piece lockout device designed for holes in electrical panels where Rack in/out rods are inserted.
- It effectively blocks access to the hole and prevents the insertion of the rod for operating devices inside the panel.
- It is recommended to use the E-Hasp 33 with this device for installing locks.
- The lockout is suitable for holes with a diameter of 20 mm and a depth ranging from 29 mm to 39 mm.

CIRCULAR ELECTRICAL PANEL HOLE LOCKOUT

- The lockout device is constructed from ABS material and securely attached using a rivet.
- Its round shape is specifically designed to lock the racking in-out point of air circuit breakers, vacuum circuit breakers, and similar devices, thus preventing unauthorized use.
- Also suitable for locking switches recessed within a plane surface.
- The lockout can rotate in any direction and features three holes on the bottom base for attachment with screws or rivets.
- An alternative installation option includes the use of strong double-sided tapes.
- **Dimension:** The device measures an outer diameter of 48 mm, inner diameter of 32 mm, with a lower cover circle side wall thickness of 7 mm. It has an overall thickness of 10 mm, divided into an upper part thickness of 3 mm, and a locking hole diameter of 8.5 mm.

YELLOW - BLACK
ELECTRICAL PANEL LOCKOUT

- Made from strong yet lightweight insulated engineering plastic / nylon material.
- Incorporates a black powder-coated metallic insert to block the operation of switches, handles, levers, or the insertion of handles into rack-in/rack-out holes.
- The black powder-coated insert enhances wear & rust resistance, improves performance, and maintains a cleaner appearance by minimizing fingerprints.
- Designed for direct rivetting onto electrical panel doors.
- Alternatively, it can be attached using screws or double-sided tapes after cleaning the panel surface.
- A padlock and tag are required to execute proper LOTO procedure.
- For scenarios where multiple individuals need to lock and manage the same control point, a lockout hasp lock can be utilized.

Available in 5 different models:
- **ES-EPL-40:** Controls cabinet door / electric handle hole / low-voltage drawer cabinet, etc.
- **ES-EPL-41:** Controls push button switch / power distribution cabinet lock hole.
- **ES-EPL-42:** Controls rotary switch/ transfer switch.

Lockout padlocks are essential for safety lockout programs, preventing accidents and protecting employees by enforcing LOTO procedures and energy control programs.These padlocks provide a means to securely fasten lockout devices in place, ensuring machinery or equipment remains inactive during maintenance, thus reducing the risk of unexpected energisation.

Available in a range of colours, shapes, sizes, and types to cater to diverse application needs. Additional customisations such as padlock numbering, metal tagging, etching on shackles, logo and department labels, and even employee photographs or codes can be requested for personalised padlocks.

If there's uncertainty about which padlocks best suit your needs, our team of experts is always available to provide guidance.

KEYING OPTIONS :
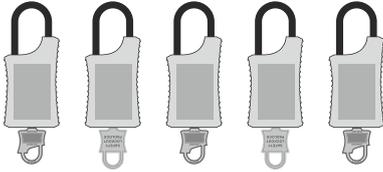

Key Different means that every lock has its individual key and the key for one lock can not open another lock in any case.
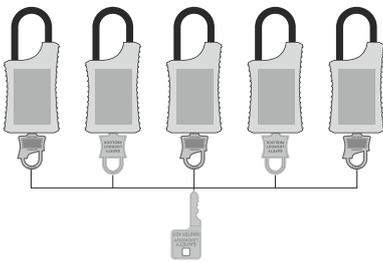

Master Key can be used to open multiple locks that are keyed differently.
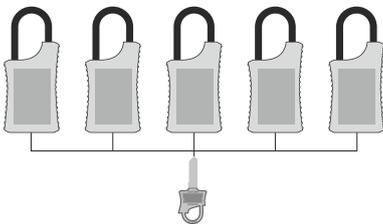

Key Alike means all locks in a set can be opened with the same key.

Attention!

OSHA LOCKOUT / TAGOUT REGULATION

1910.147(c)(5) OSHA Lockout Device requirements state that lockout devices must:

- Be provided by the employer.
- Be standardized by size, shape or color.
- Be distinguishable from locks used for other purposes. Lockout locks should only be used for lockout.
- Identify the individual who applied the lock (both tags and lock labels are acceptable for this purpose).
- Be capable of withstanding the usage environment and must be strong enough to prevent removal except by using excessive force with special tools, such as bolt cutters.
- Most importantly, whenever lockout devices are applied, they must remain under the exclusive control of the individual who attached them. No employee should be able to open a lock attached by someone else.

Kindly select the padlocks carefully as per your requirements:

- Shackle Type / Shackle Size / Padlock Body Color
- **Key Alike** (means all the supplied locks have one common key)
- **Key Different** (means that all the supplied locks can be opened with their respective keys only)
- **Key Different + Master Keys** (means that all the supplied locks can be opened with their respective keys + with one master key)

ONE PERSON, ONE LOCK, ONE KEY

OSHA's "one person, one lock, one key" rule is fundamental to Lockout Tagout (LOTO) safety practices. This principle requires each authorised employee to have a unique lock and key while performing maintenance or service work. This guarantees that the lock can only be removed by the individual who applied it, preventing accidental reactivation of the machinery or system.

This rule fosters accountability during maintenance tasks as every lock corresponds to a specific worker. It helps others know who is working on the machinery. To follow this rule, employers provide distinctive locks to employees, often differentiated by colour, shape, or size. Each worker should be the only one with their lock's key, eliminating the possibility of duplicate keys. This strategy is part of a comprehensive safety system to shield workers from hazardous energy during equipment servicing or maintenance.

If extra keys required.
They can be supplied against the confirmed order and at an extra cost.

Choose the padlock that suits your requirement

PADLOCK CUSTOMISATION

Customisation of Lockout Tagout Padlocks is not just a choice; it's a necessity in today's diverse industrial environment. The uniformity of standard locks can create confusion, heighten risks, and make safety management more complex. Customisation, on the other hand, brings clarity, control, and improved safety to your lockout tagout program.

These services are available at an extra cost depending on the work and the time involved.

Customisation Options:
- Company Name
- Logo
- Plant Location
- Lock No.
- Department Name
- EmployeeName
- Employee Photo
- Employee Code No. etc.

Metal Tagging
+ Numbering
on Shackle

Company Logo,
Department Name,
Lock Number on Label.

HANDY LOCKOUT SAFETY PADLOCKS

Padlock available in :
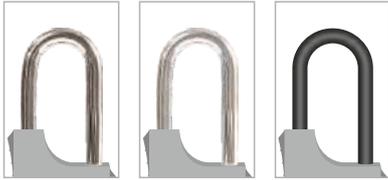

Steel Shackle

Stainless Steel Shackle

Nylon Shackle

- The nylon body is carefully crafted with ribs for easy gripping and handling.
- Supplied with an individual unique coded brass key and cylinder to provide 6-pin locking combinations for enhanced security.
- The jack locking key mechanism ensures that the key cannot be released until the shackle is closed and the padlock is locked securely.
- The reinforced nylon body is non-conductive, non-sparking, and resistant to chemicals and corrosion, making it suitable for various work environments.
- Colour-coded for easy identification, and optional photo luminescent labels are available for added visibility in the dark.
- Each padlock is supplied in a box with 1 key.
- Available in 3 options: Hardened Steel Shackle, Stainless Steel Shackle and De-Electric Nylon Shackle. The Stainless-Steel option is recommended for corrosive industrial or offshore environments. The De-Electric Nylon Shackle is recommended for locking out electrical isolation points.

## PADLOCK EYES

These Padlock Eyes are essential for retrofitting old panels to comply with Lockout Tagout requirements, ensuring equipment and electrical panels are securely locked during servicing and maintenance. They are surface-mounted, making it easy to install padlocks on electrical panels or hidden isolation points within cabinets.

- Made from durable stainless steel constant thickness sheet.
- Die-cut design accommodates most internationally available padlocks.
- Easy installation options: screwing, bolting, or riveting.
- Each set includes 10 Nos. of padlock eyes for various applications.
- Combo pack contains 2 Nos. of each type (Small / Medium / Large) - Total 12 Nos.

CUSTOMIZED LOCKOUT SAFETY PADLOCKS

Customisation of Lockout Tagout Padlocks is not just a choice; it's a necessity in today's diverse industrial environment. The uniformity of standard locks can create confusion, heighten risks, and make safety management more complex. Customisation, on the other hand, brings clarity, control, and improved safety to your lockout tagout program.

Why customization is necessary?

- **Enhanced Safety**: Customisation reduces the chances of accidental or unauthorised operation, thereby enhancing overall safety.
- **Greater Control**: Different departments can have their distinct safety protocols, reducing confusion and enhancing control.
- **Increased Efficiency**: Customised locks can streamline lockout tagout procedures, improving efficiency.
- **Clear Identification**: With customisation, locks can easily be traced to the responsible person or department, increasing accountability.
- **Compliance**: Customised Lockout Tagout Padlocks can be designed to meet specific industry standards and regulations.

Customisation Options for Lockout Padlocks:

Padlock Body Material Options

Each material offers unique properties to suit different operational environments.
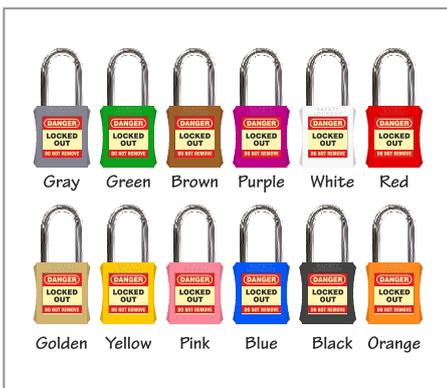

Shackle Material Options

Choose from Mini, Standard Body, Long Body, or Handy Body sizes to meet your specific lockout needs.
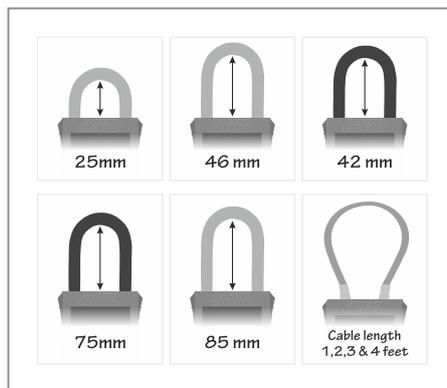

Shackle Material Options

Choose the one that aligns with the environmental conditions and security requirements of your workplace.

Body Colour Options

Choose from up to 12 colour variations to enable quick and easy identification of locks.

Shackle Height Options

Choose shackle height from our wide range of options to suit various lockout applications.
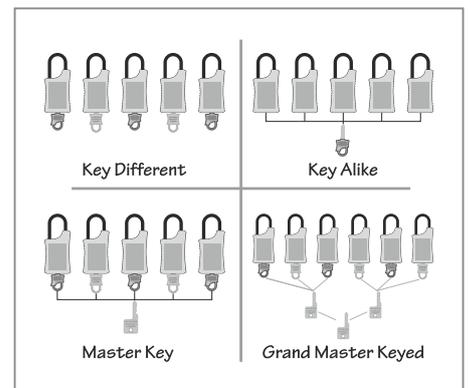

Keying Options

Keying options include KD, KA, KD + M, and GMK, offering different levels of access control.

Custom Padlock Laser Engraving

Personalise your padlocks with laser engraving of information such as employee name, employee ID number, company name, company logo, or key number.
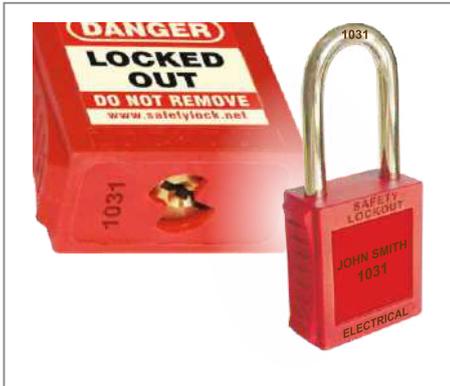

Custom Padlock Labels

Further customise your padlocks with labels featuring company logo, department, employee name, employee ID, lock label number, or custom label.

Key Engraving

Personalise the keys with unique engravings for easy identification.

Metal Tagging & Numbering on Shackle

Add another layer of identification with metal tagging and numbering on the shackle.

Number of Keys & Extra Keys

Specify the number of keys required with each lock, and order extra keys if needed.
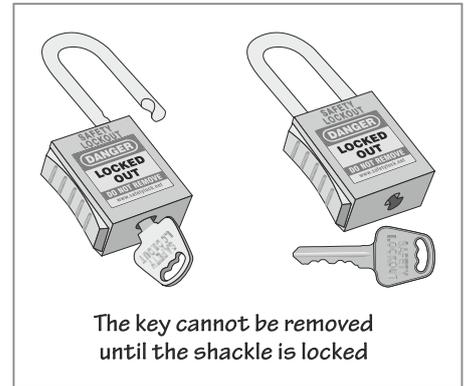

Key Retaining Feature in Padlocks

Choose padlocks with a key retaining feature to ensure that the key cannot be removed until the padlock is securely closed.

The key cannot be removed until the shackle is locked

Photo ID Custom Padlock Labels

Include Photo ID on your custom padlock labels for enhanced identification and security.
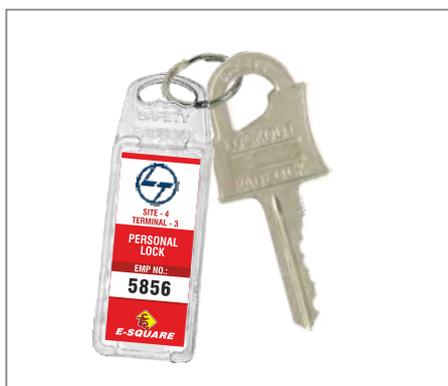

Customised Keychains for Padlocks

Add customised keychains to your padlocks for easy storage and identification.

Colour Coded Key Caps

Use colour coded key caps for easy identification and sorting of keys.

Available in many more colours
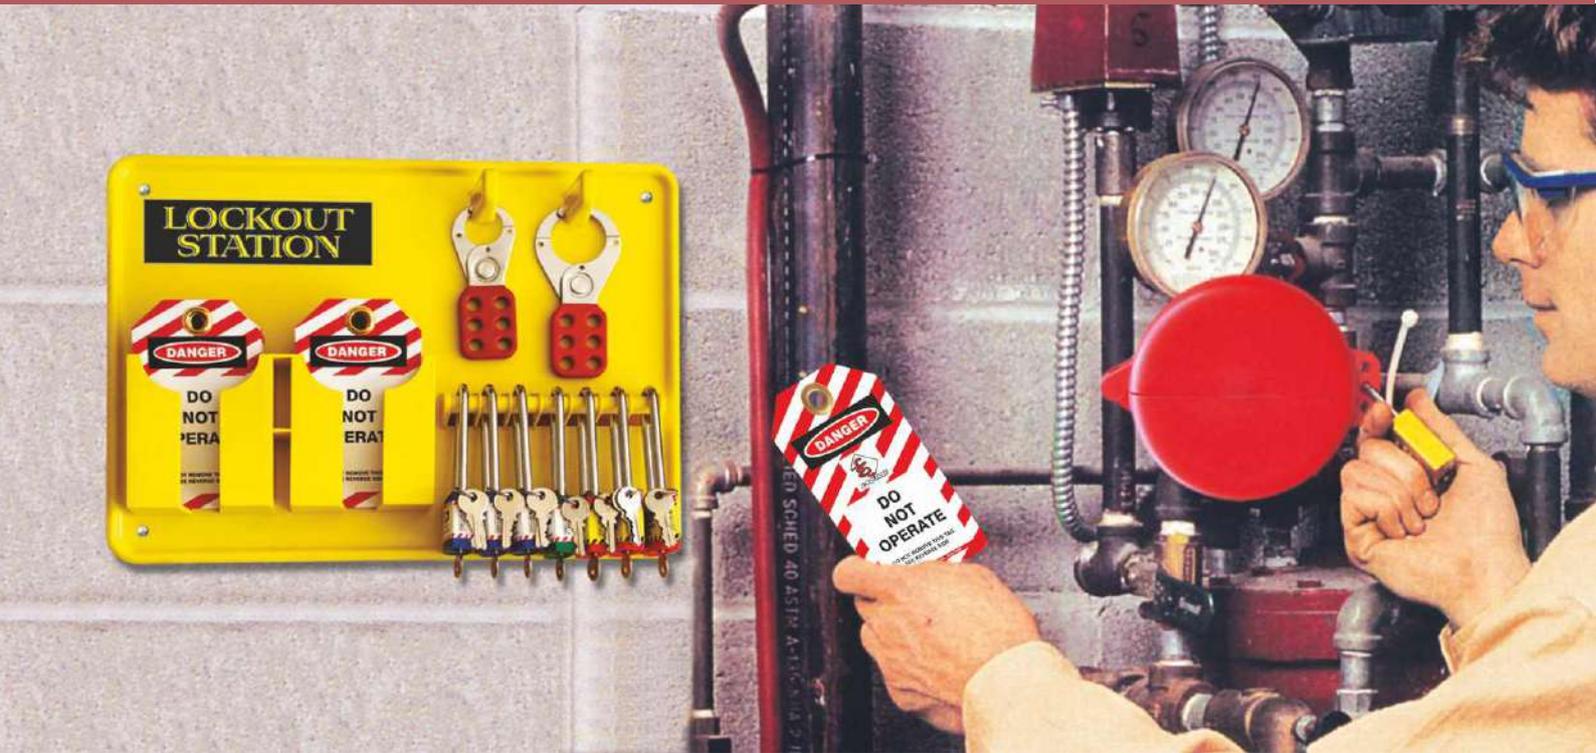

Open Lockout Stations are designed to centralize the storage of crucial safety equipment such as lockout padlocks, tags, and hasps, and some models offer additional features like document holders, clipboards, and key holders. By providing a central location for these essential tools, these stations ensure they are readily available to all personnel when needed for isolating equipment. This ensures the accessibility of safety tools, thereby making the process of locking out equipment more efficient and convenient.

They feature bold headings which prompt workers to lock out machinery before initiating any maintenance or repair work. This constant visual cue aids in ingraining safety practices, thereby fostering a safety-oriented work culture within the premises. Open Lockout Stations can be supplied with or without contents, offering flexibility based on the specific needs of a workplace.

ONE PIECE OPEN LOCKOUT STATION

- Centralizes storage of essential safety equipment like lockout padlocks, tags, and hasps, ensuring they are readily available for equipment isolation.
- Offered in configurations of 7, 16, and 48 lock combinations.
- The 48 Lock Station can be expanded in multiples of 24 by connecting additional sections.
- Customizable front label as per customer specifications including language, text, graphics, and optional logo.

CUSTOMIZED OPEN LOCKOUT STATIONS
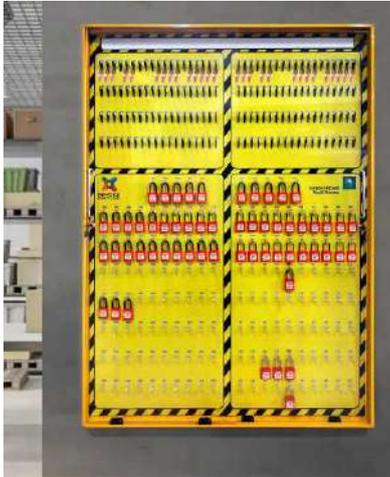

No two facilities are the same, and neither are their safety requirements. That's why customisation is critical. Our Open Lockout Stations, tailored to your precise specifications, elevate your LOTO procedures, driving safety, efficiency, and compliance in unison.

Customisation Options for Open Lockout Station:
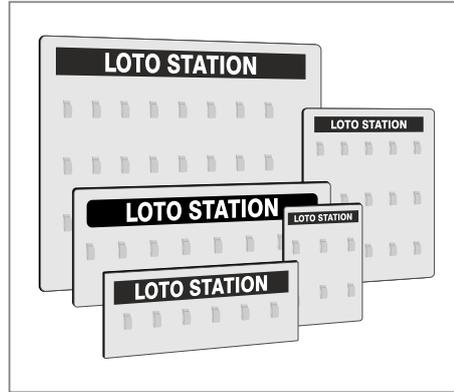

Size
Customise size as per individual requirements.
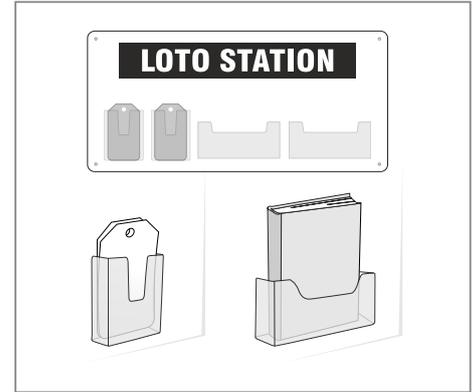

Add Special Provisions
Provisions like tag & document holders, clip boards, etc.

Mounting Option
Wall-mounted, free-standing or wheel-mounted frame.

Wheeled Frame

Free Standing Frame

Direct Mount
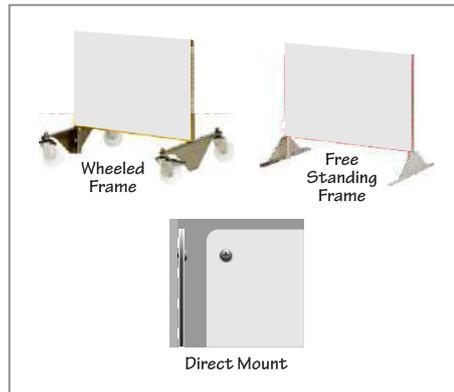

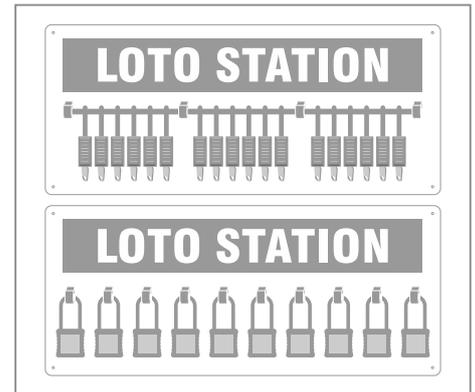

View
Lockout Padlocks with a front view or a side view.

Colour Options:

Yellow - Black

Red - White
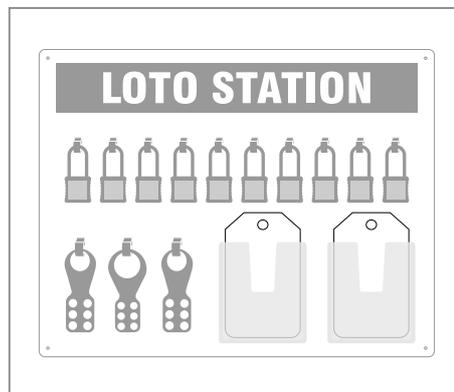

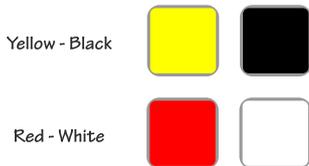

Types of Lockout Devices
Hold different LOTO devices like padlocks, tags, hasps.
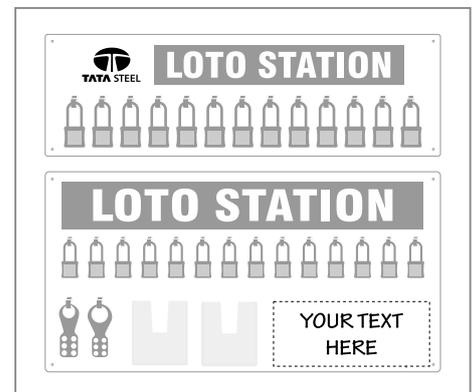

Branding
Custom branding to create a consistent visual identity.

YOUR TEXT HERE

In today's fast-paced industrial environment, safety is paramount, and ensuring an efficient Lockout/Tagout (LOTO) system plays a crucial role in maintaining that safety. At **LTT Lock**, we understand the unique demands of every industrial setup and offer Customised Lockout Tagout Shadow Boards to seamlessly integrate with your safety protocols. Designed for the unique needs of your workplace, our shadow boards provide a visual, intuitive system for managing LOTO equipment. They provide a standardised, organised system that enhances productivity, reduces downtime, and promotes a safer work environment.

- Designed for localized areas to keep isolation devices near the machine to be locked out.
- Highly visible striped design for easy identification.
- Shadows act as status indicators, clearly showing which equipment is in use.
- Available in unfilled or fully loaded options.
- Made from 4 mm ACP boards for durability.
- Customized lockout shadow boards with machine-specific procedures can be created for larger machines.

CUSTOMIZED
SHADOW LOCKOUT STATIONS

- Designed for the unique needs of your workplace, our shadow boards provide a visual, intuitive system for managing LOTO equipment. They provide a standardised, organised system that enhances productivity, reduces downtime, and promotes a safer work environment.

Why to get your LOTO shadow boards customised?

- Streamline operations by offering a centralised, visual hub for LOTO equipment.
- Boost compliance by making safety procedures more intuitive and accessible.
- Enhance branding by incorporating your company's logo, colours, and messaging.
- Support multilingual workforces with bilingual, trilingual, or multilingual options.
- It helps to enhance efficiency, safety consciousness, and adherence to safety protocols among the workforce.

Customisation Options for Lockout Tagout Shadow Boards

Choose any product from our range

Design your Own Layout

LOTO Products Inclusion

Choose any Lockout Tagout product(s), device or accessories to be included on the Shadow Board. This customisation ensures the board caters to the specific needs of your work environment / department / location where they are installed
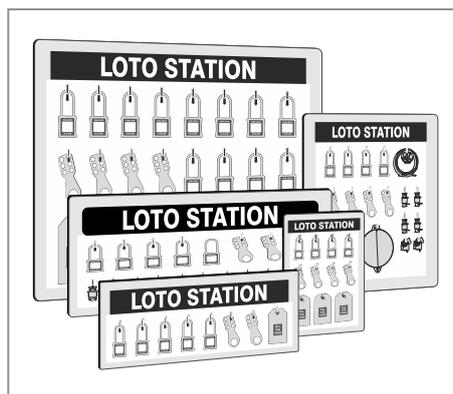

Size and Format

Whether you require a small board for a confined space or a large one for a broad wall, we can customise the size to your specifications. The format can also be tailored to suit your preference, enhancing the board's usability and aesthetics.
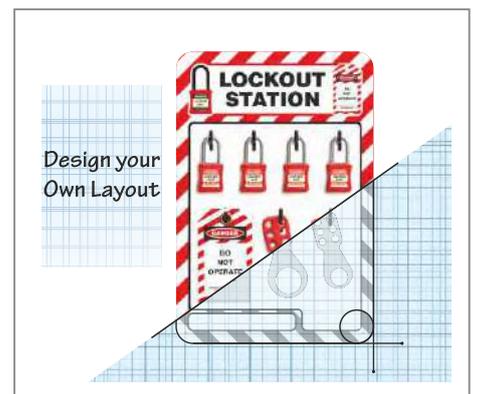

Shadow Board Layout

The layout of the board can be designed to your liking, ensuring the most frequently used tools are easily accessible.

LTTLOCK
LOCKOUT • TAGOUT • TRYOUT
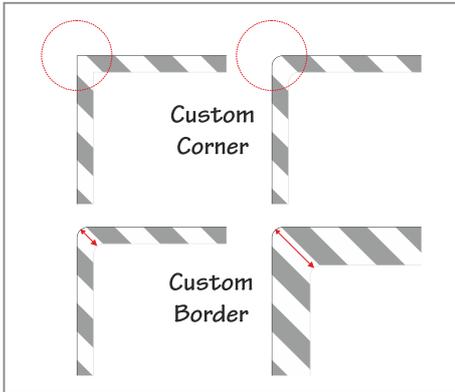

Borders and Corners

Customise the borders and corners to align with your brand's aesthetics or to enhance visibility and attention.
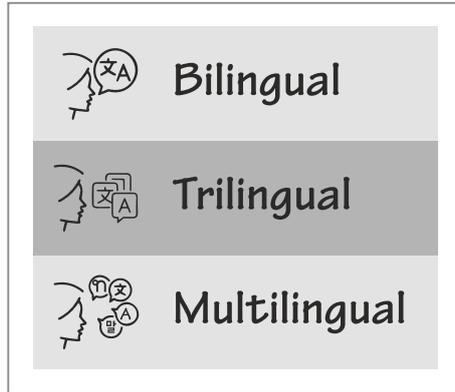

Language Options

Shadow Boards can be bilingual, trilingual, or multilingual for a diverse workforce.
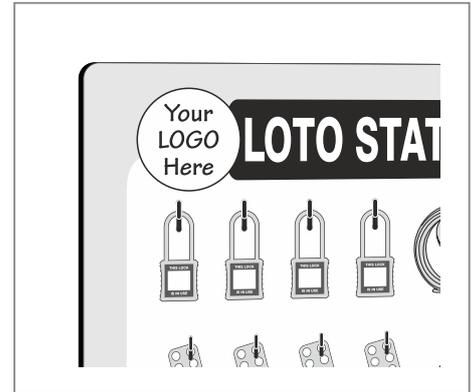

Company Logo

Reinforce your company's brand identity by including the company logo on the Shadow Board.

Safety Message or Additional Info.

Display critical safety messages, policies, or any other information that you believe would benefit your employees.

Colour Theme

Choose a colour theme that aligns with your company's brand colours, or opt for colours that enhance visibility and attention.
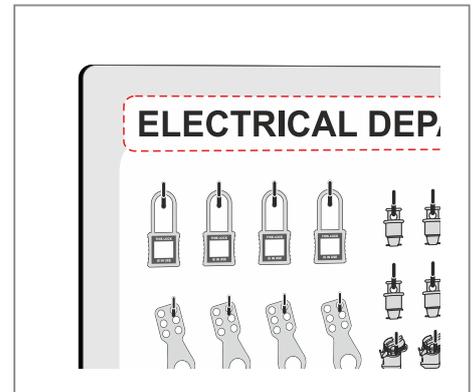

Departmental Customisation

Shadow Boards can be customised as per specific departments or areas, accommodating the unique requirements of each.
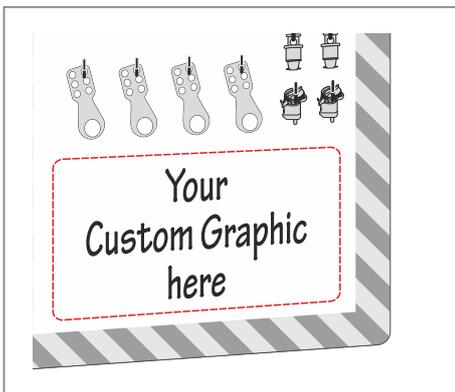

Graphics or Images

Include any graphic or image that enhances the utility or aesthetic appeal of the Shadow Board.
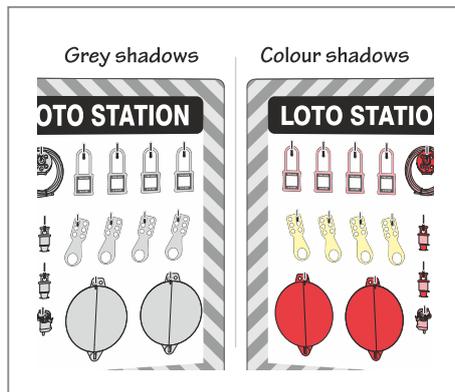

Shadow Options

Choose between grey shadows or colour shadows for a distinctive or more visual look.

Accessories

Choose from various accessories like permit holders, document holder, log book holder etc., enhancing the functionality of the Shadow Board.

Wheeled Frame

Free Standing Frame

Direct Mount

Customised Products

OR

Standard Products

LOCKOUT STATION
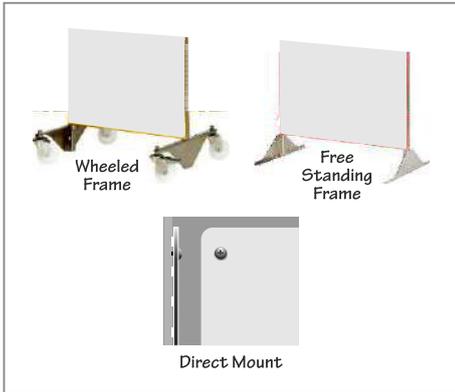

Mounting Styles

Custom mounting styles - wall mounting, free standing, wheel based/mobile mounting are available to suit your workspace design and requirements.

Product Customisation

Choose between customised/personalised or standard products in the shadow boards, allowing for further personalisation of your LOTO system.
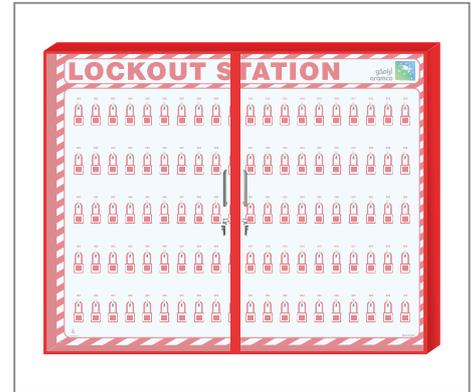

Cabinets for Shadow Boards

Customised shadow boards can also be placed in custom sized cabinets - as per customer's requirements - cabinets can provision to be locked, providing an extra layer of security and protection.

CUSTOMIZED SHADOW LOCKOUT STATIONS

We design the shadow stations as per the location and customer's requirement.

Lockout stations are a critical component of any workplace Lockout Tagout program. These stations serve as centralized storage locations for all the LOTO devices, and information required to effectively isolate mechanical and electrical control points. The objective of these stations is to ensure that lockout/tagout (LOTO) equipment is easily accessible to all staff, facilitating the implementation of safety protocols and enhancing overall workplace safety.

Lockout stations can be portable or wall-mounted, designed to be versatile and accessible to fit different work environments. The format and size of lockout stations can vary significantly depending on the specific needs of the workplace. They can be customized to cater to the requirements of individual machines, departments, locations, or entire plants.

CUSTOMIZED LOCKOUT TAGOUT PADLOCKS & KEY CABINETS

Safeguarding workplace operations demands more than just general safety measures. It requires precision, accessibility, and utmost effectiveness. Our Customised Lockout Tagout Padlock and Key Cabinets offer a comprehensive solution that ensures your safety standards are not only met but exceeded. Crafted with durability and functionality in mind, these cabinets provide an all-in-one storage solution for your padlocks and keys, while maintaining easy access for authorised personnel.

Why is customisation important?

Customisation is the key to effectiveness in any safety protocol. It ensures your LOTO Padlocks and Keys are available at the shop-floor/designated area and they should be perfectly aligned with your unique operational landscape, providing a seamless fit for your specific requirements.

- Ensures optimal utilisation of space, catering to different sizes and layouts.
- Accommodates varying levels of security with optional locking provisions.
- Facilitates brand consistency with customised printing options.
- Promotes superior accessibility with a range of door types and mounting options.

CUSTOMIZED
LOCKOUT TAGOUT STATION

Crafted meticulously using steel sheets, these stations and cabinets are designed to organise your lockout devices securely. From a choice of colours to the locking door design to tamper proof visibility, we ensure that every detail aligns with your unique requirements.

Why is customization important?

Customising lockout tagout solutions isn't merely a matter of aesthetics; it's about optimising safety, accessibility, and efficiency in your workspace.

- Tailored Protection: Customised stations align with your unique safety requirements.
- Ease of Access: Quick and easy access to LOTO devices is crucial in emergencies.
- Regulatory Compliance: Customised solutions ensure alignment with OSHA standards.
- Brand Identity: Reflect your brand's image or safety protocols.
- Space Efficiency: Choose from wall-mounted, free-standing, or wheel-mounted options based on your space availability.

A group lock box is a crucial lockout safety device used in many industrial settings, designed to enable multiple workers to work on a single piece of equipment while ensuring the safety of each individual involved. After machine or process is locked out, the key or keys of the machines are placed in a lock box. The main function of a group lock box is to securely hold keys for the locked-out equipment, preventing it from being re-energized until every individual working on the equipment has completed their work and removed their personal lock from the box.

GROUP LOCK KEY CABINET

The group lock key cabinet is specifically designed for group lockout situations, providing a secure and organized storage solution for lockout keys. Once the equipment to be worked on has been locked off, all lockout keys are placed inside the cabinet and locked by the responsible person. This ensures that access to the keys kept inside the cabinet is restricted, enhancing safety during the lockout process.

The group lock key cabinet can be customized according to the customer's requirements, including different sizes, number of internal key hangers and the option to have a specific number of locks on the cover.

SAFETY LOCKOUT BOXES

- Safety lockout boxes are designed for group lockout situations, providing a secure storage solution for lockout keys, fuses, and other important items.

- They ensure that access to these items is restricted until all lockout procedures are completed.

- All models come with inbuilt cabinet locks that cannot be removed from their slots, providing added security.

- Control keys can be "key alike" for multiple lockout boxes under the control of a responsible person, while secondary keys are "key different". Keys can be equipped with individual identification key chains for easy identification.

- All the lockout boxes have markings such as A, B, C,.... or 1, 2, 3,..... etc. for individual locks, which can be customized according to the customer's requirements. The keys also feature corresponding markings for easy matching with the boxes.

Illumination

Choose internal or external illumination for improved visibility.
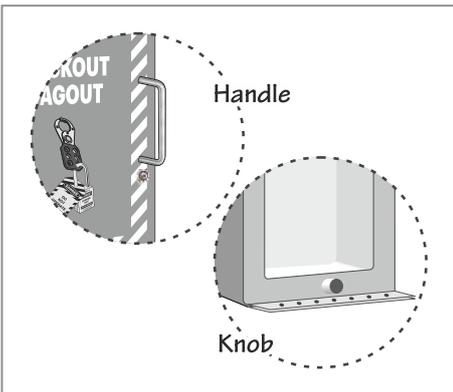

Handle

Knob

Door Accessories

Opt for a knob or handle on the front door for easy opening.

Lockout tags are an integral part of the Lockout Tagout program. Made from high-impact, flexible polyvinyl sheets, these tags are resistant to water, oil, and extreme temperatures, making them durable in a multitude of conditions, from harsh factory settings to outdoor environments. Their easily writable surface allows quick and clear communication of crucial safety information, including the nature of ongoing work, the person responsible, and the expected duration of the lockout. They can be securely attached directly using **LTT Lock**'s devices or with a nylon cable tie, providing versatility in their use.

These tags play a key role in individual and collective safety communication. The Danger Tag is used by workers to indicate they are working on specific equipment, thereby preventing accidental operation. Accident Prevention Tags, on the other hand, alert people to potential dangers in a given area or around particular machinery, while also providing important safety instructions. This way, lockout tags act as both a deterrent and an informative tool, promoting safety awareness and accident prevention in the workplace.

STANDARD SAFETY LOCKOUT TAGS

- These highly visible safety tags aid the safe running and maintenance of site machinery.
- Made from high impact styrene or flexible polyester, resistant to water, oil, and extreme temperatures ensuring durability.
- The surface of the tags is suitable for writing on with a marker pen, allowing for easy customization.
- Available in semi-rigid plastic with thickness options of 0.5mm or 0.7mm for added strength and resilience.
- Can be attached directly to E-Square devices or secured with nylon cable ties for convenience and versatility.
- DANGER TAG is designed for individual workers on equipment, acting as a visual warning to others.
- Accident Prevention Tags inform potential hazards or safety instructions for awareness and compliance.
- Our 0.7mm tags are tear-proof, ensuring their longevity even in demanding environments.
- The tags are available in packs of 10, 25, 50, or 100.

SELF LAMINATING / LINER PROTECTIVE TAGS

- Self-laminating tags have become a mainstay for environmentally hostile conditions. When you need a customized message that won't smudge or wear, use our self-laminating tags that let you seal in your message under a clear, protected layer.
- Each tag features a reinforced eyelet for sturdy hanging with a wire or nylon tie.
- Simply remove the lining and press the clear polyester layer onto your text to laminate.
- Write on this tag with any marker pen for a smudge-free message.
- Durable tags will resist water and wear in your facility.
- These tags are made of 0.7 mm white special grade PVC sheet with polyester over laminate to protect the photo and other written data.

LOCKOUT
ECONOMY TAGS

- Made of hard paper material and laminated after printing, ensuring durability.
- Offer an easy-to-write-on surface, and ensures text remains legible over time.
- Tags are equipped with a brass eyelet that can accommodate most padlock shackles, allowing for easy attachment and secure locking.
- They are typically packed in standard quantities of 100 tags, providing an economical solution for lockout tagout procedures.

PERFORATED LOCKOUT TAGS

- Perforated lockout tags feature a section that can be torn off, providing additional functionality and record-keeping capabilities.
- Numbered tags are made of durable, laminated hard card material, ensuring their longevity and resistance to wear and tear.
- The two-part design of these tags enhances operational control and accountability in LOTO procedures.
- When the tag is attached to a lockout point, the stub portion is removed, indicating that the equipment or machinery is locked out and tagged out.
- Only the employee in possession of the stub has the authority to remove the tag, ensuring proper authorization and control over the equipment.
- Once the job is completed, the stub is returned to management for verification and monitoring of lockout and tagout activities within the plant.
- This system allows for efficient tracking and documentation of lockout and tagout procedures, enhancing safety and compliance measures.

LOCKOUT
PADLOCK TAGS

- Lockout padlock tags are designed to slip easily over padlock shackles, providing a clear identification of the lockout status.
- Made from durable 0.7 mm PVC sheet, these tags are built to last and resist wear.
- The tag surface is marker-friendly, enabling users to write essential details like employee names, dates, or specific lockout instructions.
- Depending on customer requirements, the tags can be produced with or without a metal grommet that fits over most padlock shackle.
- The padlock tags hang flat on the padlock, allowing for quick identification and ensuring that the lockout status is noticed at a glance.

CUSTOMIZED
LOCKOUT TAGS

At the heart of any successful Lockout Tagout program are the tags - the critical communication tools that convey safety information right where it's needed. We understand that your business is unique and deserves safety solutions tailored to your specific protocols. With **LTT Lock** customised tags, you don't just enforce safety; you personalise it, making it an integral part of your work culture.

Why Specialised LOTO Tags Matter?

Safety information needs to be clear to the user in their own language, and it has to be precise/relevant to the equipment and the workplace scenario.

- Enhances clarity and relevance of safety information.
- Reinforces brand identity with logo printing.
- Facilitates multilingual communication for diverse workforce.
- Allows for specific instructions based on unique equipment needs.
- Ensures better visibility and durability with material, size and colour choices.

SAFETY
TAGS-IN-A-BOX

Safety Tags-In-A-Box is an exceptional solution for effortless workplace safety management, delivering a combination of portability, durability, and user-friendly design. The compact and convenient box design ensures that you always have your essential safety tags on hand. Simply store the required tags in the tag box, and add them to your tool kit or glove box in your work vehicle, making it easy to apply tags whenever you need them.

- Compact and convenient box design with hanging provision.
- Easy to carry, disposable box containing **50 safety tags.**
- Box dimensions: 170 mm H x 82 mm W x 20 mm D.
- Water-proof tags designed to prevent cracking, warping, or shrinking.
- Suitable for both indoor and outdoor use.
- Durable and tear-resistant.
- Tags measure 140 mm x 80 mm, featuring an 8 mm hole.
- Effortless writing on a double-sided, scruff-resistant matte surface.
- Ample space for signatures, dates, and additional notes on both sides.
- Tag Material: MAT TAG 330 Microns.

Easy to carry, disposable box | Compact and convenient design | Can store 50 tags in one box

ES-TIB-50	Tags In A Box - 50 Tags	140 x 80

SQUARE SAFETY TAGS-IN-A-BOX

The ideal solution for efficient workplace safety management in a compact and portable format. The sleek and space-saving box design ensures that you always have your crucial safety tags on hand, in a more compact size. Simply store the necessary tags in the tag box, and add them to your tool kit or glove box in your work vehicle, making it easy to apply tags whenever you need them. The box is designed to be easily hung with the provided hanging provision, offering an accessible and space-efficient storage solution.

- Sleek and space-saving box design with hanging provision.
- Easy to carry, disposable box containing 50 compact safety tags.
- Box dimensions: 109 mm H x 82 mm W x 20 mm D.
- Water-resistant tags designed to resist cracking, warping, and shrinkage.
- Appropriate for both indoor and outdoor applications.
- Robust, weatherproof, and tear-resistant.
- Compact tags measure 76 mm x 76 mm, featuring an 8 mm hole.
- Smooth writing experience on a double-sided, scruff-resistant matte surface.
- Adequate space for signatures, dates, and additional notes on both sides.
- Tag Material: MAT TAG 330 Microns.

TAG OPTIONS FOR TAGS-ON-A-ROLL & TAGS-IN-A-BOX

LTTLock takes pride in offering an extensive selection of high-visibility safety tags **tailored to your specific industrial needs.** Our innovative range includes warning tags, caution tags, inspection date tags, general safety tags, and a variety of accident prevention tags.

Our dedicated team of in-house designers works diligently to create these exceptional tags, which are distinct from our standard PVC tags and specially designed for bulk use and storage.

- Economical and budget-friendly.
- High-visibility and available with bright neon colours.
- Bold Warning/Danger signs for maximum impact.
- Available in square (76x76 mm) and rectangle (140x80mm) sizes.
- Available in MAT TAG 330 Microns / PET / Card Board material.
- Double-sided writing surface.
- Water-proof and tear-resistant.
- Can be fitted with a brass eyelet for enhanced durability (*MOQ Applicable).
- Customizable in **any language, graphics, text, logo, dept. name, location, colour, etc.**

ENERGY SOURCE IDENTIFICATION TAGS

Energy Source Identification tags with bold and vivid graphics are an excellent tool for helping employees identify and mark all hazardous energy sources in a particular area/machine. These ID tags assist employees in following the steps mentioned in the machine-specific lockout procedures and make your LOTO process manageable, quick and safe. Browse through our range of energy source ID tag range to select the ones best suited to your facility.

ENERGY SOURCE IDENTIFICATION TAGS : MICRO

Energy sources carry a number of risks that affect workers who service machines and equipment. Assist workers in understanding hazardous energy sources by tagging them. These single sided printed Energy Source Identification Micro Tag helps identify different control sources.

- These **PVC 0.7 mm thick** tags are tear-proof, weather-resistant, chemical-resistant and durable enough to withstand dirt, grease, liquid splashes, repeated abuse, or rough handling.
- Order individual numbers as per requirement, or purchase a kit which includes numbers 1 to 10.
- Customized numbers can be ordered in the sets of 10 pieces.

LOCKPOINT ENERGY SOURCE ID TAGS

Our comprehensive range of LockPoint Energy Source ID Tags is designed to enhance the clarity and compliance of your safety protocols, providing a reliable solution for marking and distinguishing energy isolation points. Available in both single and dual-sided variants, these tags are essential for any robust lockout tagout system.

Dual-Sided Variant:

- Visibility from multiple angles with double-sided printing.
- Crafted from resilient 0.7 mm PVC for enduring use in industrial environments.
- Standard dimensions of 3" L x 1.5" H, featuring an 8 mm hole for easy, secure attachment.

Single-Sided Variant with Foam Adhesive:

- Equipped with a heavy-duty foam adhesive for steadfast application.
- Constructed from the same durable 0.7 mm PVC material.
- Standard dimensions of 3" L x 1.5" H, without hole.

Please mention your choice of product variant at the time of ordering.

- Order individual numbers as per requirement, or purchase a kit which includes numbers 1 to 10.
- Customized numbers can be ordered in a set of 10 nos. (*MOQ Applicable)

LTTLOCK
LOCKOUT • TAGOUT • TRYOUT

Keep your workers and visitors safe in your facility with Lockout Signs. Identify energy control points that require lockout and send a clear warning that will help keep workers aware of any potential hazards near equipment, machinery and electricity.

Lockout signs are not only a great way to keep your workplace safe, but a great means of keeping productivity up through the visual identification of lockout areas. Lockout signs are available in a wide range with CAUTION and WARNING formats; sign sizes and styles also differ from each other - more than 200 signs to choose from.

Custom signs and labels can be made as per the specific requirements of the equipment or plant areas.

SAFETY LOCKOUT ARROW MARKERS

- They are normally stuck on the electrical panels / machines / pipe lines, etc. to highlight the location of the switches / valves / sockets, etc. where the lockout gadgets are to be installed.
- Detachable arrows are used to show the exact direction and spot for the warning.
- Vinyl labels are durable and stick to almost every surface.
- To apply, just peel of the label from the liner and apply to any clean surface.

SAFETY
LOCKOUT BANNERS

Lockout / Tagout (OSHA Standard 1910.147) is consistently a top-cited safety standard, reinforcing the need for clear safety communications in the workplace.

Our Lockout Tagout banners are designed to capture attention and educate workers about the critical steps and safety precautions of LOTO procedures. The clear, compelling messages on these banners support the training and reinforce the importance of LOTO.

- Banners can also be customized to any format or dimension. Additionally, we offer customization to include your company logo, departmental designation, or any other specific messaging required.
- Printed on durable materials.
- We offer these essential safety banners in multiple languages, ensuring global applicability and inclusivity at a very reasonable cost.

ES-**EDLS-01**

Explore our extensive range of lockout kits, each designed for specific safety needs. Choose from a variety of sizes, from handy pouch kits ideal for locking out circuit breakers and valves to the more extensive LOTO Bag Kits, equipped for a full spectrum of mechanical and electrical lockout scenarios. Perfect for both individuals and teams, our lockout kits are an essential part of maintaining compliance and ensuring workplace safety.

Customization to Suit Your Needs

We understand that each workplace is unique, which is why we offer customizable kits that can be personalized to align with your company's unique safety protocols. We offer customization options to incorporate your Company Name, Logo, or Department identifiers directly onto the kits. (*MOQ Applicable)

For larger systems, our specialized wall-mounted kits can be tailored to fit machine-specific lockout procedures. Trust **LTT Lock** to provide practical, customizable lockout solutions that uphold the highest safety standards.

CUSTOMIZED LOCKOUT TAGOUT KITS

Industrial survey suggests that standard lockout kits often fall short of meeting the intended purpose as nearly 50% of the products are found to be unsuitable for the specific cause for which the kits are bought.

Each industry utilizes different machinery, equipment, and energy sources, necessitating the use of specific and tailored safety devices.

CUSTOMIZED LOCKOUT POSTERS & BANNERS

Our customised Lockout Tagout posters are designed to reinforce your energy control program and serve as a tool for ingraining safe work practices in your workforce.

Our in-house team of experienced designers is ready to help you create the perfect customised poster, one that aligns with your brand theme and communicates your unique safety messages in a way that is both engaging and informative.

Whether you want to adapt one of our existing designs or start from scratch, we are here to help you create a customised Lockout Tagout poster that meets your exact needs and expectations.

Why is customization important?

Every workplace is unique, with its own set of risks, equipment, and safety protocols. This uniqueness should be reflected in your safety communication tools. Customised Lockout Tagout posters allow you to communicate your specific safety procedures accurately, ensuring that the message is clear, relevant, and effective for your team.

Customisation Options for Lockout Tagout Posters and Banners:

Choose a poster from our range to be customised or create from scratch.

Choose from standard poster sizes or get a customised size.

Incorporate any custom text or safety message.
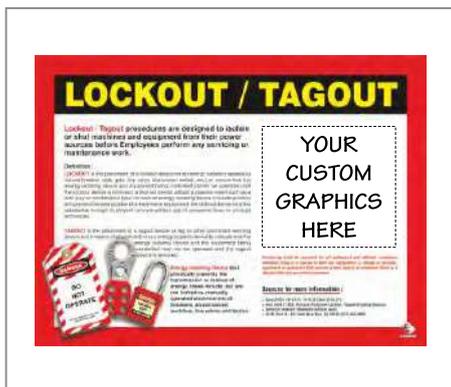

Incorporate any graphic or images.

If you have specific graphics or images that you would like to include into your customised poster.

Choose any colour theme.

Match your posters to your brand colours, or choose a colour scheme that stands out for safety.

Choose any language.

Our posters can be customised to any language, ensuring clear communication with all your employees.
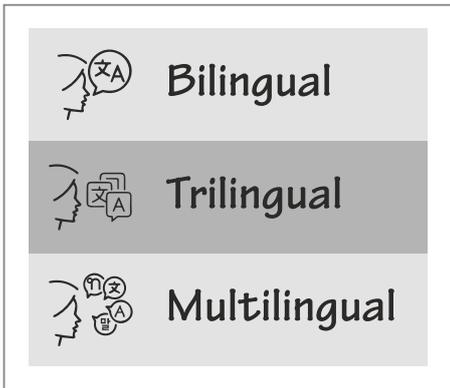

Language Options

Cater to a diverse workforce with posters in multiple languages.

Choose any poster mounting material.

Choose from materials such as 3mm, 4mm, ACP, Polycarbonate Sheet, Sun Board aka PVC Board, Self-Stick Vinyl, Paper, & Flex. Each material offers different benefits in terms of durability, flexibility & appearance.

Add any specific technical details

Include any Dept. Name or Tech. Detail

Make your posters even more relevant by including specific department names or technical details related to your equipment or procedures.
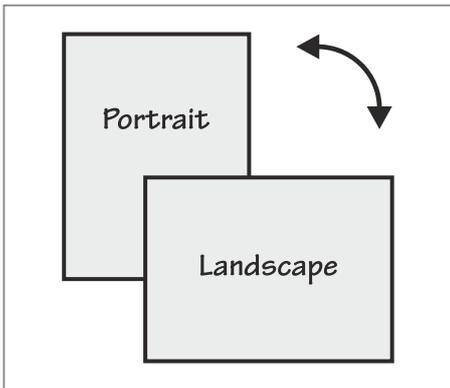

Orientation

Choose between portrait or landscape orientations based on the space and visibility requirements.
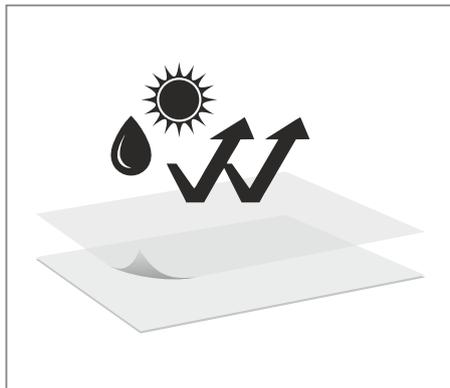

Lamination

Depending upon the environmental conditions, you can have the posters laminated for added durability.

Glossy finish

Matt finish
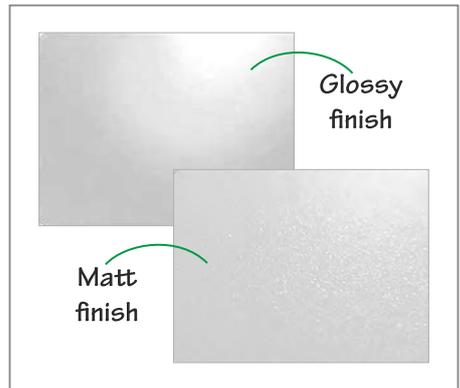

Poster Finish

Choose between matte or glossy finish based on the visibility requirements and aesthetic preference.

Add your QR Code

Inclusion of QR Codes

These can link to detailed procedures, videos or other related resources, offering additional information.

Add Company Policies Info.

Inclusion of Company Policies

Add specific company policies related to lockout tagout procedures into the design of the poster.

Steering wheel lockout covers are designed to work as a visual deterrent to prevent unauthorised personnel from attempting to start a vehicle that is currently being serviced, that is under maintenance or is being excluded from operation.

The Steering Wheel Cover displays a highly visible message to employees warning them not to start the vehicle unless authorised to do so. This helps in preventing accidents and vehicle malfunction while maximising safety in the workspace.

STEERING WHEEL COVERS WITH LOCKING TAIL

- Steering wheel cover acts as a visual deterrent to avoid unauthorised use of vehicles during maintenance.
- Fits over the steering wheel and can be locked with 1 or 2 lockout padlocks.
- Ideal for forklifts, electric pallet jacks, construction equipment and fleet vehicles
- Danger header alerts others that the vehicle is inoperable and should not be used.
- Available in 3 different sizes – 40 CM Ø, 50 CM Ø, 60 CM Ø
- Various design options available – Standard, A, B, C or Customised.
- **Available in white and yellow base colours.**
- Specify design and colour at the time of ordering.

STEERING WHEEL COVERS

- Provides visual deterrent during vehicle maintenance. Bold printed warning notifies employees not to start or move vehicle.
- Ideal for forklifts, electric pallet jacks, construction equipment and fleet vehicles.
- The upper half has a stitched pocket to slip over the steering wheel.
- Includes a brass reinforced eyelet/grommet to accommodate a padlock or hasp to fix the cover in place. Increased deterrence by using a cable to immobilise operating pedals.
- Various design options available – Standard, A, B, C, D or Customised.
- **Available in white and yellow base colours.**
- Specify design and colour at the time of ordering.

ELASTIC STEERING WHEEL COVERS

- The stretchable steering wheel lockout cover displays a highly visible message to employees warning them not to start the vehicle unless authorised to do so.
- Manufactured from high-quality micro-fibre so they can be used again and again. Washer and dryer friendly.
- Features sewn-in, no-roll elastic which surrounds the entire steering wheel. Easy on and easy off with no pull tabs.
- Available in 2 different sizes – 50 CM Ø and 60 CM Ø
- Specify design and colour at the time of ordering.

VEHICLE MAGNETIC SIGNS

- Thin yet strong, vehicle magnetic signs work as a visual deterrent to prevent unauthorised personnel from attempting to start a vehicle that is currently being serviced, that is under maintenance or is being excluded from operation.
- Easy on and off application. Can be reused again and again. Works with: cars, trucks, SUVs, vans, fleet vehicles, etc.
- Thoroughly clean the application surface as well as the back of the magnet before installing for longevity.
- Will not damage vehicle paint with proper use.
- Temporary and removable.
- Don't drag the magnet across the surface of the car. If you need to reposition the sign, remove it by pulling from a corner. This protects the finish of the vehicle.
- Don't apply the magnet over rust, trim work, deep curves, or vinyl wraps. These things create air gaps, which prevent the magnetic sheeting from fully gripping the metal.
- Various design options available – A, B, C, D or Customised.
- Available in 2 different sizes – Small and Large, either in portrait or landscape orientation.
- Specify design at the time of ordering.

LTTLOCK
LOCKOUT • TAGOUT • TRYOUT
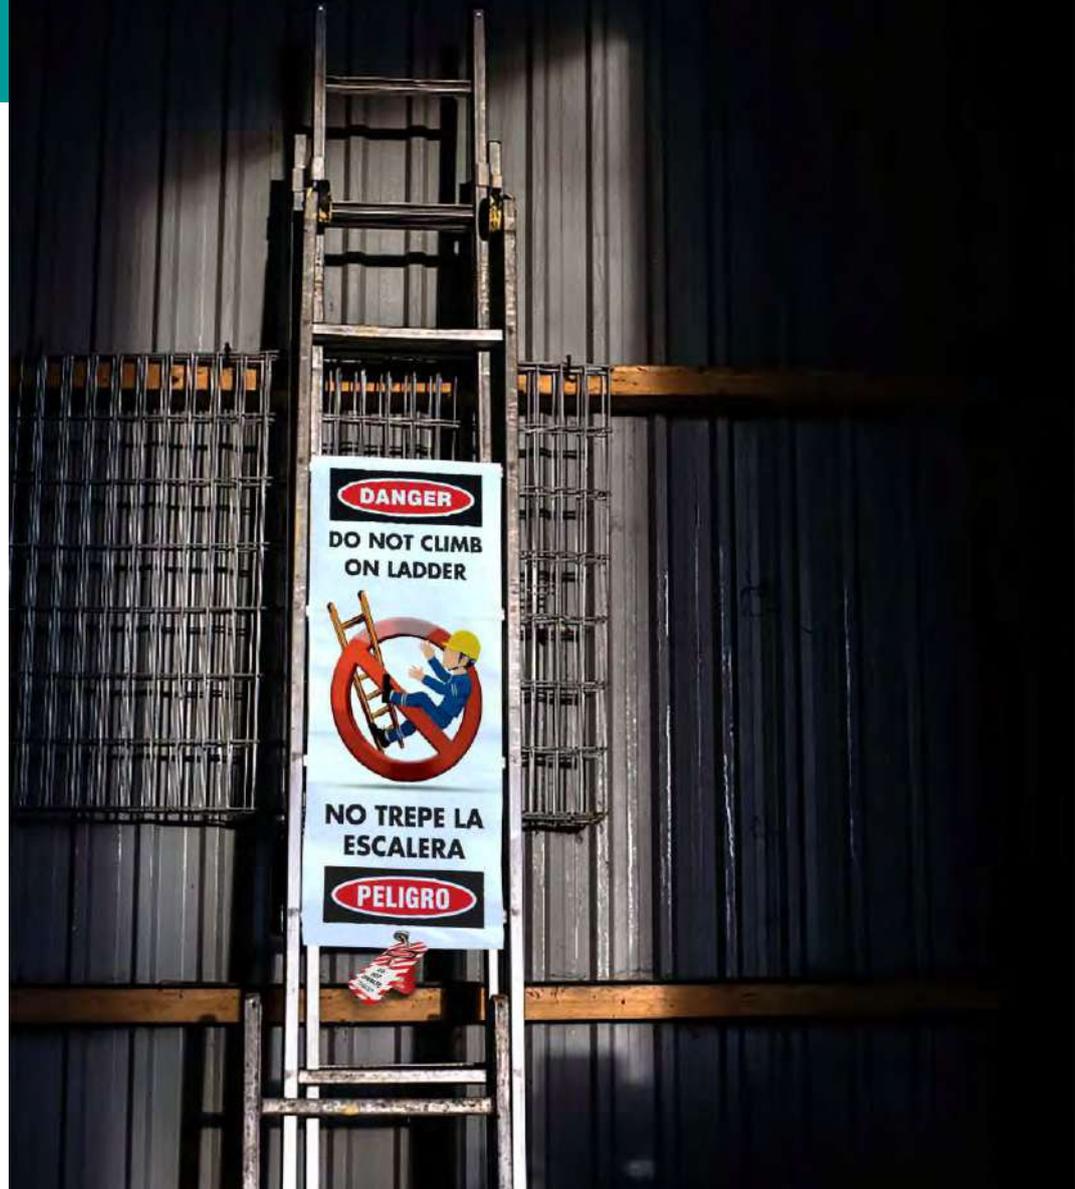

Ladders are very useful, but they can also be potentially hazardous.

Ladder lockout covers provide a professional solution to protect you, your workers and your customers by identifying and preventing access to damaged, faulty or otherwise unsafe ladders.

The Ladder Lockout is a flexible woven PVC cover designed to wrap around the lower three to four ladder rungs while the ladder is not in use.

It acts as a safety deterrent to help keep unauthorized workers/individuals from climbing the ladder and possibly harming themselves-this is a great device to promote ladder safety and prevent accidental injury.

The ladder lockout is ideal for stepladders, extendable ladders, and other types of ladders.

SINGLE SIDED
LADDER LOCKOUT

ES-LL-SS-1

- Manufactured from flexible woven PVC; this lockout device is placed over the rungs of a ladder or the steps of other climbing apparatus to deny its use.
- Brass Eyelets in each end and Hemmed Edging.
- The brass eyelets allow it to be locked out with an EML Cable Lockout, and LOTO padlock.
- Features bold safety messages with graphic and highly-visible OSHA danger headers.
- When not in use, it folds up into a compact size for storage.
- Offered in single or two (bilingual) language options.
- Can have custom graphics and messages printed to suit customer requirements.
- Available in 2 Sizes. Attaches to most standard ladders.
- **They can be ordered with or without the Kit.**
- Besides the ladder lockout, the Kit includes: 1 - EML Cable Lockout + 1.5m cable with a Single-Sided Loop, 1 - Red Lockout Padlock with Key, 5 - Accident Prevention Tags.

- **Simple Steps for Application:**
- Place ladder lockout cover over the rungs of the ladder at most visible level.
- Set it evenly so that it covers the ladder rungs properly. (Depending on rung spacing, it should cover 3 to 4 steps).
- Pass the cable through the loop at the top and insert into EML cable lockout.
- Secure the cover at the bottom by attaching a padlock and tag to the EML cable lockout.
- Multiple locks can be attached to the EML cable lockout.

DOUBLE SIDED LADDER LOCKOUT

ES-LL-DS-1

- Manufactured from weather-resistant flexible woven PVC that can wrap over 3 to 4 ladder rungs to prevent unauthorised access.
- Brass Eyelets in each end and Hemmed Edging.
- The brass eyelets allow it to be locked out with a suitable LOTO padlock and tag.
- Features bold safety messages with graphic and highly-visible OSHA danger headers.
- Ideal for stepladders, extendable ladders and other types of climbing apparatus.
- When not in use, it folds up into a compact size for storage.
- Offered in single or two (bilingual) language options.
- The rear side features stripes as a standard or can be supplied with custom print. (*MOQ Applicable).
- Can have custom graphics and messages printed to suit customer requirements.
- Available in 2 Sizes. Attaches to most standard ladders.
- **They can be ordered with or without the Kit.**
- Besides the ladder lockout, the Kit includes: 1 - EML Cable Lockout + 1.5m cable with a Single-Sided Loop, 1 – Red Lockout Padlock with Key, 5 – Accident Prevention Tags.

Simple Steps for Application:
- Place ladder lockout cover over the rungs of the ladder at most visible level.
- Set it evenly so that it covers the front and back of the ladder rungs. (Depending on rung spacing, it should cover 3 to 4 steps).
- Secure the cover at the bottom with a padlock through the two eyelets at the ends to prevent removal.

ALUMINIUM LADDER GUARD LOCKOUT

Introducing the **Aluminium Ladder Guard Lockout,** a versatile safety solution designed to prevent unauthorized access to elevated areas in your workplace. This innovative device ensures that only authorized personnel can access restricted zones, minimizing the risk of accidents and unauthorized tampering of equipment. Its durable design, easy installation, and high visibility make it an essential addition to your facility's safety measures.

- The 62" x 15" Ladder Guard Lockout device is made of durable aluminium, ensuring lightweight yet robust protection.
- Built to withstand industrial environments.
- Can be installed or removed in seconds.
- Made of 95% aluminium, 5% steel and stainless-steel nuts and bolts.
- Compatible with various ladder types and sizes, offering a flexible solution for your facility's needs.
- Can be secured in place using supplied hardware and includes padlock hasp for restricted access (*Padlock sold separately).
- Powder-coated safety yellow for durability and high visibility.

Customized pack available

Scaffold is used during construction, renovations, or maintenance by workers and is one of the primary reasons for accidents. OSHA requires industries to use proper scaffolding protection measures to safeguard workers from height hazards. It is essential to have a safe scaffolding tagging system with adequate inspections before every use to ensure it is safe to service. Scaffolding needs to be tagged using relevant devices which inform employees about the hazards pertaining to that scaffold.

Scaffolding tags and tag holders indicate if a scaffold is safe or hazardous for usage, saving the lives of employees working at heights. The universal practice is a scaffold tag system with three standard colours: green, yellow, and red. Browse through our range of scaffold tags and holders to customise the perfect scaffold safety solution.

STANDARD SCAFFOLDING TAGS & TAG HOLDER

- A dedicated scaffolding tag holder, ES-SCF-TH ensures awareness of scaffold structure status, enhancing inspection efficiency and hazard recognition.
- Simple to use with a round or universal head to fit on tube & clip or system scaffolding.
- Compatible with Tag / Insert used at sites for seamless integration into existing safety protocols.
- Available in durable materials like PP, ABS, or NYLON, depending on customer requirements and installation location.
- Wide temperature range of -20°C to +80°C, ensuring suitability for various environmental conditions.
- Each pack contains 10 Holders.
- Provides additional security with cable tie attachment or screw option at the top and bottom of the holder for enhanced stability and peace of mind.
- Dimensions: 330 mm (height) x 100 mm (width) x 6 mm (depth).

UNITAG : TAGS & TAG HOLDER

The Unitag Tag Holder and its associated components provide a comprehensive solution for efficient and reliable equipment tagging, ensuring clear identification and maintenance tracking of machinery, equipment, or assets in various industrial settings.

ES-**UTH-SSS**

- The **ES-UTH-SS Unitag Small Strop** is used in conjunction with the Unitag Tag Holder to securely attach tags to equipment or assets. The strop is 197mm in length and offers a reliable and durable solution for tagging purposes.
- The **ES-UTH-LS Unitag Long Strop** is designed for use with the Unitag Tag Holder and provides an extended length of 270mm, allowing for flexibility in attaching tags to various equipment or assets.

ES-**UTH-SS**

ES-**UTH-LS**

- The **ES-UTH Unitag Tag Holder** is an extremely robust permanent locking holder designed for securely attaching tags to various equipment, machinery, or assets.
- The tag holder is equipped with 6-inch strops made of either stainless steel or PP (Polypropylene).
- They are available in two different sizes - Small strop and Long strop.
- Additional strops can be ordered separately.
- Size: 133mm (height) x 54mm (width) x 13mm (depth)

ES-**UTH**

- The **ES-UTH-T Tags** are designed for use with the Unitag Tag Holder, forming an extremely robust and permanent insert system.
- These tags are available in standard or customized inserts and are offered in a variety of colors, including red, yellow, green, and blue.
- The tags are round-shaped and provide clear identification and information about the equipment or assets they are attached to.
- Size: 40mm Dia

ES-**UTH-T**
Design on self
adhesive die cut vinyl

- The **ES-UTH-SSS Unitag Stainless Steel Strop** is another option for securely attaching tags to equipment or assets using the Unitag Tag Holder.
- The strop is made of stainless steel, offering enhanced durability and longevity.
- The strop length is 150mm.

DANGER
CONFINED SPACE
ENTER BY
PERMIT ONLY

Confined spaces pose a serious danger in many industries, often resulting in severe injuries or even fatalities. These risks aren't limited to complex industrial environments but extend to simple storage areas as well. Those who enter these spaces, whether for work or attempted rescue, are particularly vulnerable.

The hazards of confined spaces are amplified due to limited mobility, increasing the chances of fire, explosion, flooding, or asphyxiation. To mitigate these risks, The Confined Spaces Regulations 1997 emphasizes avoiding entry wherever possible to control the risks involved.

 LTT Lock 's robust Confined Space Covers are a vital tool in maintaining safety standards in these hazardous conditions. Acting as a two-in-one solution, they provide both a physical deterrent and a clear warning sign to prevent unauthorised entry. Certain models in our range even offer protection against unwanted intrusion of litter, debris, and pests.

SIGN-O-BARRIER SS

Entry into confined spaces presents serious hazards for the employees, creating a risk of death or severe injury. **LTTLock**'s Sign-o-Barrier SS provides a sturdy and robust solution to restrict unauthorised employees' access by placing a durable physical barrier at the opening. In addition, it comes with a warning sign instructing passers-by and co-workers not to enter and indicates a potential hazard or condition requiring special attention.

- The Sign-o-Barrier SS is made from Stainless Steel sheet of 1.2 mm and provides a stable and firm solution.
- It can be firmly attached to the confined space opening using nuts and bolts. (Includes hardware – 4 nuts and 4 bolts)
- The four arms of the barrier have a scissor-like mechanism that allows the user to install and store the barrier easily.
- Comes along with a warning sign (Different signs available).
- **Sizes available:**
  (i) ES-**SOB-SS-20**: For upto 20-inch confined space opening
  (ii) ES-**SOB-SS-40**: For upto 40-inch confined space opening
- The Sign-o-Barrier SS is also available with a Lockout Tagout system to secure the barrier and protect against unauthorised removal. Simply thread a steel wire through the special nuts placed on the arms of the barrier and lockout using cable lockout **ES-SMCL**. (Supplied with **2.5 or 3.5-meter cable**) (3 mm cable dia.). (*Additional Charges Apply).

SIGN-O-SKIRT BARRIERS (PLUS TYPE)

LTT Lock's Sign-o-Skirt barriers are a solid choice for keeping people safe from dangerous confined spaces. Built from strong, powder-coated stainless steel, these barriers are robust and can withstand extreme weather and chemical conditions. They're great for securing openings of pipes, tanks, and large storage facilities.

Available in 2 Models: Plus Type and Pole Type.

- These barriers can go on openings of any shape or size. It doesn't matter if the opening is square, round, or some other shape. They can even fit on openings made from metal, wood, brick, plastic, or rubber.
- The barriers come with a safety warning that meets OSHA standards.
- These barriers are simple to set up and use.
- Slip-resistant diamond pattern underfoot holds the barrier firmly in place.
- Barrier with Lockout Tagout option available on request (*Additional Charges Apply).
- They are used as part of the manhole protection system.

SIGN-O-FLEXI BARRIER

The Sign-o-Flexi barrier by **LTTLock** is a cost-effective, simple, and effective solution to prevent unauthorised access into potentially dangerous confined spaces. It features a clear warning sign to alert passers-by and co-workers about the potential hazards.

- Made from durable polycarbonate plastic, this barrier offers a straightforward and affordable way to improve safety.
- This barrier comes with hooks on the ends of four elastic cords, making it easy to attach to manholes or similar areas.
- It includes a warning sign to alert people about the dangers of the confined space. Available Sign option A, B, C, D.
- Suitable for various sizes of confined holes.
- You can ask for customised text, pictures, logos, sizes, or longer cords (for larger manholes) to be added to your barrier. (*Additional Charges Apply).

CONFINED SPACE MANHOLE SIGN

LTTLock's Confined Space Manhole Sign is a simple, effective, and budget-friendly tool to prevent unauthorised access to dangerous confined spaces. Made of Polystyrene, it fits under most standard manhole covers and serves as a clear warning for passers-by and workers. Its lightweight design allows for easy installation.

- Made from Polystyrene, this sign provides a cost-effective and easy-to-use safety solution.
- It comes with a clear warning sign that meets OSHA standards.
- Size: The sign measures 21" in height and 30" in width.
- It's straightforward to install and use.
- They are used as part of the manhole protection system.
- Particularly suited for outdoor applications and in harsh environments where excellent abrasion and chemical resistance is required.
- Signs can be supplied as per customer's requirements in different languages, text, graphics, colours etc.
- ***NOTE:** Do not put weight or use force to tamper.
- Aluminium make and Steel make are also available .

LOCKABLE RATCHET STRAP TOWER SKIRT COVERS

LTTLock's Lockable Ratchet Strap Tower Skirt Covers are a versatile solution for securing confined space openings, offering both a clear warning sign and a barrier in one easy-to-use product. They are especially suitable for manways that need to be secured but lack a flange.

The Lockable Ratchet Strap Tower Skirt Covers come in a set, including one confined space cover and two heavy-duty ratchets. Each ratchet is equipped with 1.5-inch nylon straps secured by a grommet/eyelet. Additional covers can be purchased separately to secure multiple confined spaces on the same tower skirt with the same set of ratchets.

- Creates a lockable barrier to keep out animals, trash, debris and co-workers from unauthorised entry.
- They are designed for long-term outdoor exposure.
- Lightweight, reusable, durable and easy to clean/store.
- Provides warning as per OSHA requirements.
- Suitable for various sizes of confined holes.
- They are used as part of the manhole protection system.
- Made from bright red, solid PVC coated polyester fabric, and comes with industrial strength ratchets with 1.5" wide x 26" long nylon strapping attached with a grommet/eyelet. This fits on to columns/skirts up to 8" in diameter.
- Custom sizes and sign in different languages, colors, text can be made and supplied.
- ***Size measurements indicated refer to the cover inseam dimensions.**

ELASTIC NON-LOCKABLE VENTILATED CONFINED SPACE COVERS

- **LTTLock**'s Elastic Non-lockable Ventilated Confined Space Covers feature an elastic band for easy slip-on and slip-off application, making it a perfect solution for preventing unauthorized entry during everyday operations, turnarounds/shutdowns and outages.
- It is constructed from special strong polyester perforated cloth and is designed for high traffic confined spaces.
- Its elastic band runs the entire diameter of the cover for a secure fit, and the cover comes along with a visual warning sign to warn the passers-by and co-workers and reduce the risk of breach.
- Easy-to-use, elastic rimmed cover slips over the flange of confined space for quick application.
- Provides OSHA required signage to warn affected workers of confined space hazards
- Exceeds OSHA 29CFR 1910.146 Standard for Permit-Required Confined Space
- Mesh material provides ventilation to allow for airflow.
- Keeps unwanted materials from entering the confined space, including litter, debris and pests.
- Reusable covers are easily cleaned and stored.
- Covers manufactured in bright red colour for high visibility.
- Custom sizes, shapes, styles and signage are also available. *MOQ applicable.
- Besides all the options mentioned above, reflective or photo luminescent strips can also be installed on these covers for extra safety depending on the locations - indoor/outdoor at an additional price. (*MOQ - 10 Pieces)
- Product price can vary depending on the size, the material used, quantities ordered, sign specifications and style or other special features or specifications.

LOCKABLE VENTILATED CONFINED SPACE COVERS

LTTLock's Lockable Ventilated Confined Space Covers provide effective lockable barrier protection to prevent unauthorised entry. It fits most entry and egress points on man-ways, heater doors, nozzles and vessel skirts. The lockable and adjustable cover is fitted over the existing flange and is secured by installing a padlock. These covers are ideal for areas where noxious gasses are a concern, and it includes a 1.5" gas-testing port that allows for testing without removing the cover.

- Creates a lockable barrier to keep out animals, trash, debris and co-workers from unauthorised entry.
- The outer rim features adjustable cable lockout, which can be locked with the help of a padlock to allow access to authorised personnel only.
- Lockable polyester net construction for ventilated areas with solid side coverings on flanges.
- Lightweight, reusable, durable and easy to clean/store.
- Provides OSHA required signage to warn affected workers of confined space hazards.
- Mesh material provides ventilation to allow for airflow.
- Suitable for various sizes of confined holes.
- They are used as part of the manhole protection system.
- It includes a 1.5 inch gas-testing port that allows for testing without removing the cover.
- Custom sizes, shapes, styles and signage are also available. (*MOQ applicable).

CONFINED SPACE TAGS

- Double-sided semi-rigid plastic tags of 0.5/0.7 mm thickness allow people to enter all relevant information and protect workers from potentially dangerous environments.

- Both OSHA Confined Space Warning Tags and Checklist tags are available. These tags inform about entry permits, workers in confined spaces, inspections, occupants, and prevent unprepared entry.

- The Confined Space safety tags comply with the OSHA CFR 1910.145(f) requirements.

- Their surfaces allow you to write on them using a marker pen.

- Our quality 0.7 mm tags are tear-proof and can withstand harsh weather conditions.

- Available in packs of 10/25/50/100.

LTTLock's Confined Space Tags are used to alert workers of safety hazards. They act as a visual deterrent that stops unauthorised people from entering confined spaces such as access shafts, manholes, sewers, tunnels, tanks and silos. Confined Space Tags highlight specific areas that are hazardous, restricted, and require permits before entry.
